Political Science Abstracts IFI/Plenum Data Company staff,2013-11-11 Political Science Abstracts is an annual supplement to the Political Science Government and Public Policy Series of The Universal Reference System which was first published in 1967 All back issues are still available **The Best System Money Can Buy** Carolyn Warner,2011-03-15 As the European Union moved in the 1990s to a unified market and stronger common institutions most observers assumed that the changes would reduce corruption Aspects of the stronger EU promised to preclude or at least reduce malfeasance regulatory harmonization freer trade and privatization of publicly owned enterprises Market efficiencies would render corrupt practices more visible and less common In The Best System Money Can Buy Carolyn M Warner systematically and often entertainingly gives the lie to these assumptions and provides a framework for understanding the persistence of corruption in the Western states of the EU In compelling case studies she shows that under certain conditions politicians and firms across Europe chose to counter the increased competition they faced due to liberal markets and political reforms by resorting to corruption More elections have made ever larger funding demands on political parties privatization has proved to be a theme park for economic crime and party profit firms and politicians collude in many areas where EU harmonization

has resulted in a net reduction in law enforcement powers and state led export promotion efforts especially in the armaments infrastructure and energy sectors have virtually institutionalized bribery The assumptions that corruption and modernity are incompatible or that Western Europe is somehow immune to corruption simply do not hold as Warner conveys through colorful analyses of scandals in which large corporations politicians and bureaucrats engage in criminal activity in order to facilitate mergers and block competition and in which officials accept private payments for public services rendered At the same time the book shows the extent to which corruption is driven by the very economic and political reforms thought to decrease it International Relations Steven C.
