## **The Art Of Humane Education:**

**The Art of Humane Education** Donald Phillip Verene, 2018-05-31 In *The Art of Humane Education* Donald Phillip Verene presents a new statement of the classical and humanist ideals that he believes should guide education in the liberal arts and sciences. These ideals are lost, he contends, in the corporate atmosphere of the contemporary university with its emphasis on administration, faculty careerism, and student performance. Verene addresses questions of how and what to teach and offers practical suggestions for the conduct of class sessions, the relationship between teacher and student, the interpretation of texts, and the meaning and use of a canon of great books. In sharp contrast to the current tendency toward specialization, Verene considers the aim of college education to be self-knowledge pursued through study of all fields of thought. Education, in his view, must be based on acquisition of the arts of reading, writing, and thinking. He regards the class lecture as a form of oratory that should be presented in accordance with the well-known principles of rhetoric. *The Art of Humane Education*, styled as a series of letters, makes the author's original and practical ideas very clear. In this elegant book, Verene explores the full range of issues surrounding humane education. On the humanities: Despite Descartes, the study of humane letters has remained, but it is always in danger of passing out of the curriculum. It remains a beggar who will not quite leave the premises. On teaching: Like oratory, teaching requires a natural gift, but it is also an art which, like all the other humane arts, can be learned only mimetically. As some are born tone-deaf and cannot be musical, there are those who can never teach. But most, if they wish, have some aptitude for it, and this aptitude can be developed into an art. On teachers: Teachers motivated by eloquence attempt to speak wholly on a subject since the whole is where its life is. Teachers not motivated by eloquence tend to be either dull or comedic. The dull teacher may have knowledge but have no true language for it. The comedic teacher is shallow and a menace to the subject matter. On administrators: Administration is never content simply to concern itself with the pure business of the university, paying its bills, maintaining its buildings. It sees itself as necessary in order for the process between teacher and student to go on. But it is a process that it constantly interrupts. Administrators, however, should not be taken too seriously. Although sharply critical of many aspects of the modern university and of many currents within the humanities, *The Art of Humane Education* remains at heart a ringing endorsement of the high humanist tradition and its continuing relevance to the institutions of teaching and learning.

**Education through the Arts for Well-Being and Community** Catherine Burke, Peter Cunningham, Lottie Hoare, 2020-12-30 *Education through the Arts for Well-Being and Community* examines Sir Alec Clegg's distinctive contribution to education reform. Revisiting the significance of Clegg's principles for education in the 21st century, the book investigates the impact of his innovative approach to education and his advocacy of an arts-based curriculum to promote physical and mental health. The book explores a variety of perspectives on Clegg's working relationships, career, and achievements. Sir David Attenborough's foreword remembers his uncle Alec as a lively young teacher, and Sir Tim Brighouse considers Clegg as a model for his own

leadership in educational reform Eight authors in all bring a range of academic and professional insights to this study of an exceptional educationalist Clegg's national influence as Chief Education Officer in Yorkshire and his impact on schools teacher education and wider communities through an integrated approach to the arts are richly illustrated in text and pictures Two aspects of his work have particular topical relevance Clegg's emphatic concern for children in distress and his encouragement of creativity through teacher education This book will be of great interest for academics scholars and students in the field of the history of education educational policy and reform and all concerned with the role of schools in young people's development     *The Detroit Educational Bulletin* Detroit (Mich.). Keri Cronin, 2018-04-09 Animal rights activists today regularly use visual imagery in their efforts to shape the public's understanding of what it means to be kind, cruel, and inhumane toward animals. *Art for Animals* explores the early history of this form of advocacy through the images and the people who harnessed their power. Following in the footsteps of earlier formed organizations like the RSPCA and ASPCA, animal advocacy groups such as the Victoria Street Society for the Protection of Animals from Vivisection made significant use of visual art in literature and campaign materials. But enabled by new and improved technologies and techniques, they took the imagery much further than their predecessors did, turning toward vivid, pointed, and at times graphic depictions of human-animal interactions. Keri Cronin explains why the activist community embraced this approach, details how the use of such tools played a critical role in educational and reform movements in the United States, Canada, and England, and traces their impact in public and private spaces. Far from being peripheral illustrations of points articulated in written texts or argued in impassioned speeches, these photographs, prints, paintings, exhibitions, magic lantern slides, and films were key components of animal advocacy at the time, both educating the general public and creating a sense of shared identity among the reformers. Uniquely focused on imagery from the early days of the animal rights movement and filled with striking visuals, *Art for Animals* sheds new light on the history and development of modern animal advocacy.
