Kimberly, George A. Wood, 2020-04-03 This book deals with the History of the Discovery of Australia The world was old before Australia was wrested by navigators from her primal gloom and obscurity Throughout the long roll of centuries of ancient greatness the oceans were unexplored Their refluxing rippling glassy vastnesses were even more impenetrable than the densest forest thicket The Christian era was well advanced when men were bold enough to seek to fathom their mysteries The ancients believed their little world contained the whole habitable globe A little knowledge of the laws of the universe made them fear bottomless precipices which bounded the earth and therefore they cared not to go out to the rising sun and over to the twilight A few were curious and their prophetic verse picturing great distant continents we still possess Until the end of the fifteenth century maritime adventure was confined to the seas between and round the known parts of the continents Great Britain and the islands south of Japan and China In previous centuries travellers had gone through Asia to India and China and learnt that Timor and the Molacca Islands north west of Australia were centres of Eastern trade In their dahows and junks the Easterners constantly visited these islands and gained from them what wealth they could Marco Polo a famous Venetian traveller of the thirteenth century had many remarkable adventures in China Japan Sumatra Java and Ceylon and his accounts of new races astonished beyond measure those who read them Nothing was known of an ocean route to these beautiful regions The sixteenth century was allowed to wane and die without any navigator being known to specially visit Australia It is quite possible that vessels had been wrecked during storms on her rocky boundaries but if so the passengers with the ships were overwhelmed by the ocean waves It was however early in the seventeenth century that the first detailed discovery was made The natives of the East Indies had meanwhile become familiar with Portuguese Dutch and Spaniards alike but the pristine silence of southern oceans was often

rudely broken by the cries of conflicting ships companies The Spaniards and the Portuguese were in deadly enmity and slaughtered each other with impunity Nor was that all For much more than a century the East Indies supplied a hunting ground for bloodthirsty Europeans who constantly preyed upon the weaker and ignorant natives In their greed for wealth and in their brute love for slaughter they thought nothing of devastating towns and murdering the inhabitants Privateers and buccaneers roved the southern seas and Englishmen were not backward in the deadly game then carried on But while this was proceeding navigators of the same noble caste as Columbus were making their useful voyages and taking back to Europe astounding news of divers rich great countries Portuguese Spanish Dutch French and English all deserve honour for their services to navigation in the Southern Hemisphere and especially so far as Australia is concerned the Dutch and English It is remarkable that more wrecks did not occur while they were prosecuting their adventurous search for knowing nothing of the Australian coast nor of the gales which periodically blow so strongly there was the possibility of their at any moment sinking to the bottom of the ocean So far away from their homes and trusting their lives to comparatively fragile vessels they had much to chance But they were cautious men possessing qualities which fitted them for almost any position a community can offer and those of their journals which are extant prove that they possessed no mediocre literary ability And with all their caution they were remarkably courageous and permeated with an intense love of adventure Official Year Book of the Commonwealth of Australia ,1928 Issues for 1901 07 1901 20 include corrected statistics for the period 1788 to 1900 *The Discovery of Australia. a Critical, Documentary and Historic Investigation Concerning the Priority of Discovery in Australasia by Europeans Before* George Collingridge,2018-02-04 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **DISCOVERY OF AUSTRALIA** George Arnold 1865-1928 Wood,2016-08-25 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and
