

Modelling Belief Dynamics

For a computer scientist the ultimate solution to the problem about belief revision is to develop *algorithms* for computing appropriate revision and contraction functions for an arbitrary belief system.

(Peter Gärdenfors)

The following considerations concern modelling Belief Dynamics (BD) not just in the sense of a formalization, but rather in the sense of building a *computational* model and implementing the corresponding data structures and algorithms of recomputing beliefs. The purpose of such a project is to illustrate some ideas about belief changes in a Web of Beliefs (WoB) to explore and deepen one's understanding of belief changes by trying to implement or improve corresponding algorithms. With implementation one will proceed from more basic models, which make a lot of simplifications, to more extended models, which look more at internal belief structure and employ more refined algorithms.

The Dynamics Of Belief:

The Dynamics of Belief Don B. Harbuck, 1969 *The Dynamics of Belief* Peter Forrest, 1986-01-01 *The Laws of Belief* Wolfgang Spohn, 2012-03-29 Wolfgang Spohn presents the first full account of the dynamic laws of belief by means of ranking theory This book is his long awaited presentation of ranking theory and its ramifications He motivates and introduces the basic notion of a ranking function which recognises degrees of belief and at the same time accounts for belief simpliciter He provides a measurement theory for ranking functions accounts for auto epistemology in ranking theoretic terms and explicates the basic notion of a deductive or non deductive reason The rich philosophical applications of Spohn s theory include a new account of lawlikeness an account of ceteris paribus laws a new perspective on dispositions a rich and detailed theory of deterministic causation an understanding of natural modalities as an objectification of epistemic modalities an account of the experiential basis of belief and thus a restructuring of the debate on foundationalism and coherentism and externalism and contextualism and finally a revival of fundamental a priori principles of reason fathoming the basics of empiricism and the relation between reason and truth and concluding in a proof of a weak principle of causality All this is accompanied by thorough comparative discussions on a general level as well as within each topic and in particular with respect to probability theory *The Fixation of Belief and Its Undoing* Isaac Levi, 1991-10-25 Isaac Levi s new book is concerned with how one can justify changing one s beliefs The discussion is deeply informed by the belief doubt model advocated by C S Peirce and John Dewey of which the book provides a substantial analysis Professor Levi then addresses the conceptual framework of potential changes available to an inquirer A structural approach to propositional attitudes is proposed which rejects the conventional view that a propositional attitude involves a relation between an agent and either a linguistic entity or some other intentional object such as a proposition or set of possible worlds The last two chapters offer an account of change in states of full belief understood as changes in commitments rather than changes in performance one chapter deals with adding new information to a belief state the other with giving up information The book builds upon topics discussed in some of Levi s earlier work It will be of particular interest to discussion theorists epistemologists philosophers of science computer scientists and cognitive psychologists *The Dynamics of Faith* Khagendranath Mitra, 1952 [Debate Dynamics: How Controversy Improves Our Beliefs](#) Gregor Betz, 2012-08-15 Is critical argumentation an effective way to overcome disagreement And does the exchange of arguments bring opponents in a controversy closer to the truth This study provides a new perspective on these pivotal questions By means of multi agent simulations it investigates the truth and consensus conduciveness of controversial debates The book brings together research in formal epistemology and argumentation theory Aside from its consequences for discursive practice the work may have important implications for philosophy of science and the way we construe scientific rationality as well **Breaking Free from the Tyranny of Beliefs** Lark Aleta Batey, 2012-03-30 At the foundational level of westernized cultures is a Core Belief Matrix This matrix

consists of seven imbedded beliefs that bind us to a three dimensional world of limitations Author Lark Batey takes the reader on a fascinating and liberating journey of systematic investigation and self exploration that reveals the ruse of the matrix and guides the reader to the discovery of the Sovereign Self As a consciousness explorer the reader will travel through historical events that defined the matrix experience the story of our origins through the mythology of The Grand Experiment and learn more about archetypal influence by traversing the mountains and valleys of our inner landscape through The Fools Journey and other universal paths of awakening Traveling deeper into ones psyche the explorer discovers how the play of duality psychological overlays and shame deepen the oppression of the Matrixs hold upon us The next destination on the journey takes the explorer to the Field of All Possibilities where glimpses of the Sovereign Self appear Finally the matrix can be dismantled and the explorer can Break Free from the Tyranny of Beliefsto dream new dreams that will create new worlds

The Dynamics of Pilgrimage Dee Dyas,2020-10-08 This book offers a systematic chronological analysis of the role played by the human senses in experiencing pilgrimage and sacred places past and present It thus addresses two major gaps in the existing literature by providing a broad historical narrative against which patterns of continuity and change can be more meaningfully discussed and focusing on the central but curiously neglected area of the core dynamics of pilgrim experience Bringing together the still developing fields of Pilgrimage Studies and Sensory Studies in a historically framed conversation this interdisciplinary study traces the dynamics of pilgrimage and engagement with holy places from the beginnings of the Judaeo Christian tradition to the resurgence of interest evident in twenty first century England Perspectives from a wide range of disciplines from history to neuroscience are used to examine themes including sacred sites in the Bible and Early Church pilgrimage and holy places in early and later medieval England the impact of the English Reformation revival of pilgrimage and sacred places during the nineteenth and twentieth Centuries and the emergence of modern place centred popular spirituality Addressing the resurgence of pilgrimage and its persistent link to the attachment of meaning to place this book will be a key reference for scholars of Pilgrimage Studies History of Religion Religious Studies Sensory Studies Medieval Studies and Early Modern Studies

The Dynamics of Judicial Proof Marilyn MacCrimmon,Peter Tillers,2012-12-06 Fact finding in judicial proceedings is a dynamic process This collection of papers considers whether computational methods or other formal logical methods developed in disciplines such as artificial intelligence decision theory and probability theory can facilitate the study and management of dynamic evidentiary and inferential processes in litigation The papers gathered here have several epicenters including i the dynamics of judicial proof ii the relationship between artificial intelligence or formal analysis and common sense iii the logic of factual inference including a the relationship between causality and inference and b the relationship between language and factual inference iv the logic of discovery including the role of abduction and serendipity in the process of investigation and proof of factual matters and v the relationship between decision and inference

Belief Change Dov M. Gabbay,Philippe Smets,2012-12-06

Belief change is an emerging field of artificial intelligence and information science dedicated to the dynamics of information and the present book provides a state of the art picture of its formal foundations. It deals with the addition, deletion, and combination of pieces of information and more generally with the revision, updating, and fusion of knowledge bases. The book offers an extensive coverage of and seeks to reconcile two traditions in the kinematics of belief that often ignore each other: the symbolic and the numerical, often probabilistic approaches. Moreover, the work encompasses both revision and fusion problems, even though these two are also commonly investigated by different communities. Finally, the book presents the numerical view of belief change beyond the probabilistic framework, covering such approaches as possibility theory, belief functions, and convex gambles. The work thus presents a unified view of belief change operators, drawing from a widely scattered literature embracing philosophical logic, artificial intelligence, uncertainty modelling, and database systems. The material is a clearly organised guide to the literature on the dynamics of epistemic states, knowledge bases, and uncertain information, suitable for scholars and graduate students familiar with applied logic, knowledge representation, and uncertain reasoning.
