The Guinness Of Speed Facts And Feats:

The Guinness Book of Speed Facts & Feats Bill Gunston, David Taylor, Andy Ewart, 1984 Contains information about speeds associated with living things sports vehicles technology and science A Sideways Look at Time Jay Griffiths, 2004-03-08 A brilliant and poetic exploration of the way that we experience time in our everyday lives Why does time seem so short How does women s time differ from men s Why does time seem to move slowly in the countryside and quickly in cities How do different cultures around the world see time In A Sideways Look at Time Jay Griffiths takes readers on an extraordinary tour of time as we have never seen it before With this dazzling and defiant work Griffiths introduces us to dimensions of time that are largely forgotten in our modern lives She presents an infectious argument for other more magical times the diverse cycles of nature of folktale or carnival when time is unlimited and on our side This is a book for those who suspect that there s more to time than clocks Irresistible and provocative A Sideways Look at Time could change the way we view time forever Approaches to Literature Through Theme Paula Kay Montgomery, 1992-06-26 Product information not available **The Pettingell Book of Birding Records** Noel Pettingell, David M. Tricas,Samuel H. Gruber,2013-06-29 The elasmobranch fishes include the living sharks skates and rays that are important members of nearly all marine ecosystems Their large size secretive behavior and wide ranging habits make them difficult to observe in the field or to maintain in captivity Consequently little is known about their natural behavior and how it is mediated by their sensory systems This volume is dedicated to the scientific contributions and memory of Donald Nelson a pioneer in the study of shark behavior sensory biology and remote instrumentation The two opening papers review Don Nelson s unique scientific accomplishments and provide insight into his strong bias towards study of animals in the field These are followed by 14 scientific papers on elasmobranch behavior sensory biology and current monitoring technologies The papers on elasmobranch sensory biology and behavior address questions on hearing the lateral line electroreception the brain orientation behavior chemical irritants feeding and reproduction The latter section of the volume presents papers on conventional tagging techniques ultrasonic telemetry physiological telemetry remote monitoring techniques archival tagging and satellite tagging The intent of this volume is to familiarize both new and established scientists with the sensory biology and behavior of sharks and rays and to encourage further behavioral research on these animals in their natural environment

The 1920 Olympic Games Bill Mallon,Anthony Th. Bijkerk,2015-07-11 Until this volume was compiled the results of the 1920 Olympics held in Antwerp Belgium have been far from complete The Antwerp organizing committee typed up a report of the results almost as an afterthought because it was so financially strapped after the games For some events only the medalists are listed with little if any additional information Very few copies were ever produced and those few copies were in French The seventh in a series on the early Olympics this work fills a gap in the recording of early Olympics history by providing complete results for all competitors and all events except for shooting which has only partial information available

In virtually all cases a 1920 source has been used in preference to a more modern source of information and all details have been fully researched in contemporary newspapers journals and magazines and checked for accuracy by experts on various sports from all over the world *My Life in the Wild* Ivan Tors,1979 History of Technology Volume 33 Ian Inkster,2017-06-01 While political and social historians have made great progress in trying to understand the making of modern Greece by studying politics and power struggles little attention has been given TO the co evolution of the Greek state and the technologies that were developed during this period This volume HELPS fills this gap exploring the formation of the Greek state and the construction of modern Greece through the lens of the history of technology and industry The contributors look at the role of engineering institutions the press and of infrastructure technological networks in promoting specific technocratic ideals and legitimizing social roles for the engineers of the period The volume as a whole offers new insights into the way that engineering culture institutional reforms and infrastructures contributed to the making of modern Greece Special Issue History of Technology in Greece from the Early 19th to 21st Century Edited by Stathis Arapostathis and Aristotelis Tympas *Library Association Record* Library Association,1972 Proceedings of the 22d 33d annual conference of the Library Association in v 1 12 proceedings of the 34th 44th 47th 57th annual conference issued as a supplement to v 13 23 new ser v 3 ser 4 v 1 *British Books in Print* ,1985 Sport and the English Middle Classes, 1870-1914 John Lowerson,1993 This book examines the phenomena which explain the boom in sport among the middle classes in late Victorian England The author focuses on the extent to which sport became an agent of the development of the middle classes and an instrument of their self definition The book does not set out to explain the making of the English middle classes rather it examines a significant part of that making
