**Development** Sandy Jackson, Luc Goossens, 2020-01-29 Handbook of Adolescent Development fills a gap in the literature on adolescent development and behaviour. All of the authors of the various chapters were invited to include as many findings on European adolescents as possible. The contributors are all eminent researchers in the field and the individual chapters cover their specific areas of expertise. Theories of adolescence along with emotional, physical and cognitive issues are explored. Topics covered include families, peer relations, school and leisure time as well as problem areas such as depression, drug consumption and delinquency. Handbook of Adolescent Development also incorporates a comprehensive review of the literature in the area and considers avenues for future research. Frédéric Guay, Herbert Marsh, Dennis M. McInerney, Rhonda G. Craven, 2015-06-01 The concept of the Self has a long history that dates back from the ancient Greeks such as Aristotle to more contemporary thinkers such as Wundt James Mead Cooley Freud Rogers and Erikson Tesser Felson 2000 Research on the Self relates to a range of phenomena including self esteem self concept self protection self verification self awareness identity self efficacy self determination etc that could be sharply different or very similar Despite this long tradition of thinkers and the numerous studies conducted on the Self this concept is still not very well defined More precisely it is not a precise object of study but rather a collection of loosely related subtopics Baumesiter 1998 Also in the philosophical literature the legitimacy of the concept of self has been brought into question Some authors have argued that the self is not a psychological entity per se but rather an illusion created by the complex interplay between cognitive and neurological subsystems Zahavi 2005 Although no definitive consensus has been reached regarding the Self we emphasis in this volume that the Self and its related phenomena including self concept motivation and identity are crucial for understanding consciousness and therefore important to understand human behavior Self concept motivation and identity Underpinning success with research and practice provides thus a unique insight into self concept and its relationship to motivation and identity from varied theoretical and empirical perspectives This volume is intended to develop both theoretical and methodological ideas and to present empirical evidence demonstrating the importance of theory and research to effective practice
