From Ancient Myth to Modern Healing Pamela Donleavy, Ann Shearer, 2008-06-30 This book is about the energy personified by the classical Greek goddess Themis who brought her divine and natural right order to gods and humans and who still presides over law courts as the figure of Justice In many Western countries today the growing disease in minds and bodies of individuals is often echoed in whole communities Rather than coming together they seem to split apart in anger and distress But themis energy is equally powerful and can work to bring together and to heal From the battle of the Titans and Olympians to the oracle at Delphi and the banquet of the gods the stories of the goddess weave through these chapters to illuminate how themis energy is at work today The authors explore psychological healing in individuals and relate this to new research in neurocardiology on the subtle interactions of body and mind They show how the international movement for restorative justice is drawing on the same healing tools to benefit victims and offenders alike And they evoke the extraordinary story of the South African Truth and Reconciliation Commission which shows the world how themis energy can help transform a ravaged society This book deepens understanding of the psychological urge towards healing and wholeness which is as much a part of human beings as the urge to destroy It offers exciting new insights into Jung's unique approach to the relationship between individual and collective psychology It will appeal to psychologists who work with individuals and groups to lawyers and others concerned with the failure of current criminal justice systems and to people involved in religious political and other groups that seek to build communities which can encompass and even celebrate diversity rather than rejecting it in fear

Staging Change Victoria L. Scrimmer, 2024-12-12 Exploring a wide variety of examples of activist performances such as David Buckel's self immolation and the January 6th capitol insurrection this book

analyses activist performance through the lens of postdramatic theatre theory Staging Change poses the provocative question are activists addicted to drama Scrimmer examines the ways in which the performance and reception of protest is informed by the logic of dramatic theatre and argues that such performative arrangements are so naturalized that they can limit the ability of activists and their audiences to imagine different ways of precipitating change By combining performance analysis interviews with artists and activists and autoethnographic accounts of the author's own experiences as an environmental activist the book illustrates the limitations and alternatives to dramatic representation in activist performance The last decade has seen an increase in political demonstrations worldwide particularly following the excitement and disappointments of the Arab Spring uprisings We have seen several notable movements such as the Occupy movement the mobilization of Black Lives Matter and the MeToo movement In response scholars artists and activists from diverse disciplines have produced an exciting array of practical and theoretical approaches for talking about and thinking through activism Utilizing these interdisciplinary approaches Scrimmer offers us a theoretical inquiry into the possible applications of Hans Thies Lehmann's postdramatic theatre theory in the context of political activism and subsequently extends an alternative conceptual model for activist performance beyond the dramatic paradigm
