The Arabs in Antiquity Jan Retso,2013-07-04 The history of the Arabs in antiquity from their earliest appearance around 853 BC until the first century of Islam is described in this book It traces the mention of people called Arabs in all relevant ancient sources and suggests a new interpretation of their history It is suggested that the ancient Arabs were more a religious community than an ethnic group which would explain why the designation Arab could be easily adopted by the early Muslim tribes The Arabs of antiquity thus resemble the early Islamic Arabs more than is usually assumed both being united by common bonds of religious ideology and law

The Formation of Arab Reason Mohammed Abed Al-Jabri, 2011-01-05 Since the earliest period of Islamic history Arab thought has been dominated by a reverence for tradition and textual analysis In this groundbreaking work the great contemporary Arab philosopher Mohammed Abed Al Jabiri seeks to chart a route towards modernity via the proposition that respect for textualism and tradition are not inconsistent with rationalism and that both history and philosophy are key to the evolution of knowledge systems and ways of reasoning in Arab culture This book has been an enormous influence within the Arab world on the Islam and Modernity discourse It is published here for the first time in English and provides a fascinating insight into the currents

of contemporary Arab thought **The Formation of Islam** Jonathan P. Berkey, 2003 Jonathan Berkey's 2003 book surveys the religious history of the peoples of the Near East from roughly 600 to 1800 CE. The opening chapter examines the religious scene in the Near East in late antiquity and the religious traditions which preceded Islam. Subsequent chapters investigate Islam's first century and the beginnings of its own traditions, the classical period from the accession of the Abbasids to the rise of the Buyid amirs and thereafter the emergence of new forms of Islam in the middle period. Throughout, close attention is paid to the experiences of Jews and Christians as well as Muslims. The book stresses that Islam did not appear all at once but emerged slowly as part of a prolonged process whereby it was differentiated from other religious traditions and indeed that much that we take as characteristic of Islam is in fact the product of the medieval period **Imagining the Arabs** Webb Peter Webb, 2016-05-31 Who are the Arabs? When did people begin calling themselves Arabs? And what was the Arabs' role in the rise of Islam? Investigating these core questions about Arab identity and history by marshalling the widest array of Arabic sources employed hitherto and by closely interpreting the evidence with theories of identity and ethnicity, *Imagining the Arabs* proposes new answers to the riddle of Arab origins and fundamental reinterpretations of early Islamic history. This book reveals that the time-honoured stereotypes which depict Arabs as ancient Arabian Bedouin are entirely misleading because the essence of Arab identity was in fact devised by Muslims during the first centuries of Islam. Arab identity emerged and evolved as groups imagined new notions of community to suit the radically changing circumstances of life in the early Caliphate. The idea of the Arab was a device which Muslims utilised to articulate their communal identity to negotiate post-Conquest power relations and to explain the rise of Islam. Over Islam's first four centuries, political elites, genealogists, poetry collectors, historians and grammarians all participated in a vibrant process of imagining and re-imagining Arab identity and history, and the sum of their works established a powerful tradition that influences Middle Eastern communities to the present day Arabs in the Early Islamic Empire Brian Ulrich, 2019-05-09 Examining a single broad tribal identity, al-Azad from the immediate pre-Islamic period into the early Abbasid era, this book notes the ways it was continually refashioned over that time. It explores the ways in which the rise of the early Islamic empire influenced the peoples of the Arabian Peninsula who became a core part of it and examines the connections between the kinship societies and the developing state of the early caliphate. This helps us to understand how what are often called tribal forms of social organisation conditioned its growth and helped shape what became its common elite culture. Studying the relationship between tribe and state during the first two centuries of the caliphate, author Brian Ulrich's focus is on understanding the survival and transformation of tribal identity until it became part of the literate high culture of the Abbasid caliphate and a component of a larger Arab ethnic identity. He argues that from pre-Islamic Arabia to the caliphate, greater continuity existed between tribal identity and social practice than is generally portrayed.
