The Architecture Of Hiromi Fujii:

The Architecture of Hiromi Fujii Hiromi Fujii, Kenneth Frampton, John E. M. Whiteman, 1987 **Hiromi Fujii**, 1981
Architecture of Hiromi Fujii K. Frampton, **Hiromi Fujii - Architecture and Projects in the '70 - '80** Chris Fawcett, 1981 Hiromi Fujii Philip Charles Moore, 1988 Architectures of Life and Death Andrej Radman, Stavros Kousoulas, 2021-06-17 Driven by the Foucauldian attitude of subsuming architectural history into a genealogy of techne *Architectures of Life and Death* advances a transdisciplinary approach rethinking subjectivity and exploring the political ramifications of these processes for the discipline of architecture and beyond In contrast to mainstream approaches architecture will not be seen as representative of culture but as the mechanism of culture the collective equipment that rests on the reciprocal determination of social habits and technological habitats In this sense the idea that we shape our environments therefore they shape us is not to be taken as a metaphor The animate has always been utterly dependent on the inanimate A livable habitat is one which the inhabitant actively co evolves with and which does not constitute a ready made condition to which the inhabitant would simply have to passively adapt **Responding to Chaos** David N Buck, 2014-04-04 A celebration of a unique culture and its experience of design this sensitive text is a timely examination of Japanese design at the start of a new century The country s economic boom in the 1980s produced a surge of interest in land and building and consequently in design in all its forms From restaurant interiors to products from private housing to recreational spaces design received an unprecedented degree of attention However the bursting in the early 1990s of this so called bubble economy has prompted a re examination of design and its role in urban society **Contemporary Japanese Architecture** James Steele, 2017-03-16 *Contemporary Japanese Architecture* presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture **Resisting Postmodern Architecture** Stylianos Giamarelos, 2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic

juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism Resisting Postmodern Architecture resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarelos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography

Autonomous Architecture in Flanders Caroline Voet ,Katrien Vandermarliere,Sofie De Caigny,Lara Schrijver,2016-06-05 The influence and position of the Generation 74 in Flemish and international architecture Five well known architects who studied together in Ghent Marie Jos Van Hee Christian Kieckens Marc Dubois Paul Robbrecht and Hilde Daem can be considered as leading protagonists of their generation From their education at Sint Lucas Institute and the Academy of Fine Arts to the present day their professional careers and legacy have been of great importance to the development of Flemish architecture In their early works and writings they established a distinct architectural language rooted in historical knowledge and with a reflection to art and craftsmanship Architecture was singled out as a spatial phenomenon with an autonomous logic grounded in inhabitation and experience This generation represents a significant turn towards architectural autonomy in Flanders which resonated with similar international developments in the late 1970s Moreover they played a decisive role in the emancipation and professionalization of the architectural culture in Flanders With contributions by Birgit Cleppe Ghent University Sofie De Caigny CVAa Maarten Delbeke Ghent University Fredie Flor KU Leuven William Mann Yves Schoonjans KU Leuven Eireen Schreurs TU Delft Lara Schrijver University of Antwerp Dirk Somers Ghent University Sven Sterken KU Leuven Mechthild Stuhlmacher TU Delft Hera Van Sande VUB KU Leuven Katrien Vandermarliere Caroline Voet KU Leuven

Modern Architecture: A Critical History (Fifth) (World of Art) Kenneth Frampton,2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton s highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of Modern Architecture Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to

build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever

New Japan Architecture Geeta Mehta, Deanna MacDonald, 2012-07-09 Featuring dozens of high quality photographs schematic designs and insightful commentary this Japanese architecture book is a must have for architects or collectors The past five years are widely considered to have been the most innovative period in contemporary Japanese design history The projects featured in New Japan Architecture were completed during this extraordinarily fertile time Featuring breathtaking images of modern Japan this volume presents forty eight extraordinary projects by forty two of the world's leading architects including Hitoshi Abe Ward Kishi Tadao Ando Chiba Manabu Architects Toyo Ito Kengo Kuma Kazuyo Sejima This architecture book features a wide range of buildings some exhibiting the ultimate ideal of the white Zen cube while others exemplify the search for the new wow factor in iconic design In many cutting edge modernity is counterbalanced by a concern for sustainability an issue that has motivated many architects to rethink and reintroduce concepts drawn from traditional Japanese architecture Projects big and small private and public residential and commercial are included Insightful text by two leading experts in the field of Japanese architecture highlights the remarkable aspects of each building and places these developments within the wider context of world architecture Offering an essential overview of current trends New Japan Architecture points the way to modern architecture's future

Materials and Meaning in Contemporary Japanese Architecture Dana Buntrock, 2013-09-13 In this beautiful and perceptive book Dana Buntrock examines for the first time how tradition is incorporated into contemporary Japanese architecture Looking at the work of five architects Fumihiko Maki Terunobu Fujimori Ryoji Suzuki Kengo Kuma and Jun Aoki Buntrock reveals the aims influencing many wonderful works barely known in the West the sensual side of Japanese architecture borne out of approaches often less concerned with professionalism than with people and place The buildings described in this book illustrate an architecture that embraces uniqueness expressing unusual stories in the rough outlines of rammed earth and rust and demonstrating new paths opening up for architectural practice today For some these examples will offer new insight into expressions of tradition in Japanese architecture for others this book offers inspiration for their own efforts to assert the unique heritage of other regions around the world Compelling insightful and groundbreaking this book is essential for everyone studying Japanese architecture and anyone trying to invoke narrative and tradition in contemporary design

Architecture for a Free Subjectivity Dr Simone Brott, 2013-06-28 Architecture for a Free Subjectivity reformulates the French philosopher Gilles Deleuze's model of subjectivity for architecture by surveying the prolific effects of architectural encounter and the spaces that figure in them For Deleuze and his Lacanian collaborator Félix Guattari subjectivity does not refer to a person but to the potential for and event of matter becoming subject and the myriad ways for this to take place By extension this book theorizes architecture as a self-actuating or creative agency for the liberation of purely impersonal effects Imagine a chemical reaction a riot in the

banlieues indeed a walk through a city Simone Brott declares that the architectural object does not merely take part in the production of subjectivity but that it constitutes its own This book is to date the only attempt to develop Deleuze s philosophy of subjectivity in singularly architectural terms Through a screening of modern and postmodern American and European works this provocative volume draws the reader into a close encounter with architectural interiors film scenes and other arrangements while interrogating the discourses of subjectivity surrounding them and the evacuation of the subject in the contemporary discussion The impersonal effects of architecture radically changes the methodology just as it reimagines architectural subjectivity for the twenty first century Oppositions Reader K. Michael Hays,1998-11 A collection of essays from 26 issues of *Oppositions* this text presents contributions from architects theorists and historians such as Aldo Rossi Alan Colquhoun Leon Krier and Denise Scott Brown amongst others are included **Waterstone's Guide to Books** Waterstone & Co., Ltd,1989 **Compositions in Architecture** Don Hanlon,2009-03-23 Architecture Use the patterns of architectural composition to inspire creative design In *Compositions in Architecture* Don Hanlon offers students an excitingly original path to discovering architectural composition one that avoids the traditional either/or choice between theory and practice By exploring the underlying patterns of organization in architecture this book enables the reader to connect architectural theory with the design process And by relating what happens in the design studio with how the architect thinks about architectural composition the approach spurs creative thinking With examples that range across diverse cultures and historical periods from the famous to the obscure the author reveals the universal compositional strategies that can be used to solve particular architectural problems Readers will explore The five formal properties of composition number geometry proportion hierarchy and orientation How the plan conveys the central organizing strategy of a building Typological similarities of architectural forms that cut across cultural social historical and geographic boundaries Enriched by a graphic approach that will appeal to visual learners *Compositions in Architecture* reveals the formal structures in architecture throughout the world as well as through the ages and inspires architects to turn abstract ideas into real world design The Visibility of Modernization in Architecture Gevork Hartoonian,2023-07-28 This edited collection explores the visibility of modernization in architecture produced in different capitalist regions across the world and provides readers with a historico theoretical and historico geographical discussion Focusing on a particular building type an influential architect s work as well as relevant texts and documents each chapter addresses the many facets of delay which are central to the problematization of capitalism s progressive dissemination of technological and aesthetic regimes of modernism This collection underlines the centrality of temporality for a critical understanding of colonialism modernism and capitalism The book is primarily concerned with the historical timeline the tangential point when a nation enters modernization processes In exploring modernism in diverse regions such as East Asia Pacific Eastern Europe and Iran each chapter addresses the historiographic and architectonic unfolding of modernization beyond the western hemisphere The exploration of these diverse case studies will be of interest to

students of architecture and researchers working on the collision of temporalities and the subject's critical importance for different country's built environments Chapter 13 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
