Dictionary of Printing and Publishing Ellis Peters, pseud., Maria de Lurdes Medeiros, 1989 Principles and Practice of South African Lexicography R. H. Gouws, D. J. Prinsloo, 2010-10-01 Principles and Practice of South African Lexicography is directed at experts in the field of practical and theoretical lexicography in South Africa applying the general theory of lexicography to the South African lexicographic environment The authors of this book are leaders in the field of South African lexicography and active participants in the international lexicographic arena publishing regularly in national and international journals and giving papers at international conferences and workshops

Publishing in Tsarist Russia Yukiko Tatsumi, Taro Tsurumi, 2020-02-20 According to Benedict Anderson the rapid expansion of print media during the late 1700s popularised national history and standardised national languages thus helping create nation states and national identities at the expense of the old empires Publishing in Tsarist Russia challenges this theory and by examining the history of Russian publishing through a transnational lens reveals how the popular press played an important and complex Imperial role while providing a soft infrastructure which the subjects could access to change Imperial order As this volume convincingly argues this is because the Russian language at this time was a lingua franca it

crossed borders and boundaries reaching speakers of varying nationalities Russian publications then were able to effectively operate within the structure of Imperialism but as a public space they went beyond the control of the Tsar and ethnic Russians This exciting international team of scholars provide a much needed fresh take on the history of Russian publishing and contribute significantly to our understanding of print media language and empire from the 18th to 20th centuries Publishing in Tsarist Russia is therefore a vital resource for scholars of Russian history comparative nationalism and publishing studies *Religious Publishing and Print Culture in Modern China* Philip Clart, Gregory Adam Scott, 2014-12-16

Scholarly interest in print culture and in the study of religion in modern China has increased in recent years propelled by maturing approaches to the study of cultural history and by a growing recognition that both were important elements of China's recent past The influence of China in the contemporary world continues to expand and with it has come an urgent need to understand the processes by which its modern history was made Issues of religious freedom and of religion's influence on the public sphere continue to be contentious but important subjects of scholarly work and the role of print and textual media has not dimmed with the advent of electronic communication This book *Religious Publishing and Print Culture in Modern China 1800-2012* speaks to these contemporary and historical issues by bringing to light the important and abiding connections between religious development and modern print culture in China Bringing together these two subjects has a great deal of potential for producing insights that will appeal to scholars working in a range of fields from media studies to social historians Each chapter demonstrates how focusing on the role of publishing among religious groups in modern China generates new insights and raises new questions They examine how religious actors understood the role of printed texts in religion dealt with issues of translation and exegesis produced print media that heralded social and ideological changes and expressed new self understandings in their published works They also address the impact of new technologies such as mechanized movable type and lithographic presses in the production and meaning of religious texts Finally the chapters identify where religious print culture crossed confessional lines connecting religious traditions through links of shared textual genres commercial publishing companies and the contributions of individual editors and authors This book thus demonstrates how in embracing modern print media and building upon their longstanding traditional print cultures Christian Buddhist Daoist and popular religious groups were developed and defined in modern China While the chapter authors are specialists in religious traditions they have made use of recent studies into publishing and print culture and like many of the subjects of their research are able to make connections across religious boundaries and link together seemingly discrete traditions
