YouGuide Ltd, **Neue Zeitschrift für Musik** ,1994 *Approaches and Methods in Event Studies* Tomas

Pernecky,2016-05-12 The recent proliferation of events as a subject of study in its own right has signalled the emergence of a new field event studies However whilst the management inspired notion of planned events which strives for conceptual slenderness may indeed be useful for event managers the moment we attempt to advance knowledge about events as social cultural and political phenomena we realise the extent to which the field is theoretically impoverished Event studies it is

argued must transcend overt business like perspectives in order to grasp events in their complexities This book challenges the reader to reach beyond the established modes of thinking about events by placing them against a backdrop of much wider critical discourse Approaches and Methods in Event Studies emerges as a conceptual and methodological tour de force comprising the works of scholars of diverse backgrounds coming together to address a range of philosophical theoretical and methods related problems The areas covered include the concepts of eventification and eventual approaches to events a mobilities paradigm rhizomatic events critical discourse analysis visual methods reflexive and ethnographic research into events and indigenous acumen Researchers and students engaged in the study of events will draw much inspiration from the contributions and from the volume as a whole

Collections Management as Critical Museum Practice Cara Krmpotich, Alice Stevenson, 2024-07-22 There is a common misconception that collections management in museums is a set of rote procedures or technical practices that follow universal standards of best practice This volume recognises collections management as a political critical and social project involving considerable intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies Collections Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia

and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work **Shamanic Drumming Circles Guide** Michael Drake, 2014-05-28

Indigenous shamanic peoples have gathered in community drum circles for thousands of years Although most of us did not grow up in an indigenous shamanic tradition we can still tap into the healing power of shamanic drumming Drawing upon twenty five years of experience shamanic practitioner Michael Drake has written a step by step guide to creating and facilitating shamanic drumming circles
