The 2000 Presidential Election in the South Robert P. Steed, Laurence W. Moreland, 2002-03-30 This volume is the fifth in a series of analyses of elections in the South beginning with the 1984 general elections and continuing in 1988 1992 and 1996 While the presidential election has been the focus other important aspects of contemporary Southern electoral politics have also been examined including congressional and state elections as well as the overall status of party development and competition in each Southern state Steed and Moreland continue the general organization plan of the previous publications in this volume beginning with an introductory chapter on general issues and background a chapter on

presidential primaries an examination of the particular issues of the 2000 presidential election and a look at religion and Southern politics Experts on the individual states then analyze the contests in each state and the volume concludes with a summary of the lessons to be gained from the 2000 election cycle An definitive work for all scholars students and researchers involved with contemporary Southern politics and presidential elections *The Dynamics of Southern Politics* Seth C. McKee,2018-07-17 I cannot praise the author enough for rising to the challenge of providing students with an accessible trip through time to show the emergence of the one party South and how the South evolved over time Keith Lee Georgia College Taking a hard look at the changing demographics in the American South *The Dynamics of Southern Politics* discusses how this region remains exceptional while also addressing how that exceptionalism is eroding Author Seth McKee tells a historically rich story going back to the end of the Civil War tracks electoral changes to the present and explores some of the most significant components contributing to partisan change Supported by a host of detailed tables and figures this book pairs a strong historical foundation with an in depth analysis of the contemporary region *Ex-Centric Souths* Urszula Niewiadomska-Flis,2020-02-04 *Ex Centric Souths Re Imagining Southern Centers and Peripheries* adds a voice in ongoing attempts to chart new routes and to decenter the South in many ways in the hope of exploring Southern identity and multiple Souths The articles collected in this volume bring to the forefront the translocal and transnational connections and relationships between the South and the circum Caribbean region they address the changing nature of Southernness and especially its sense of place and finally they investigate the potential of various texts to narrate and revisit regional concerns Some contributions hold up to view topics ignored and marginalized while other decontextualize themes and issues central to Southern studies by telling alternative histories *Conflict of Interests* Alan Draper,2018-08-06 On the basis of extensive archival research Alan Draper illuminates the role organized labor played in the southern civil rights movement He documents the substantial support the AFL CIO and its southern state councils gave to the struggle for black equality suggesting that labor s political leadership recognized an opportunity in the civil rights movement Frustrated in their efforts to organize the South labor leaders understood the potential of newly enfranchised blacks to challenge conservative southern Democrats At the same time white union members in the South were more interested in defending their racial privileges than in allying themselves with blacks An explosive tension developed between labor s political leadership desperate to create a party system in the South that included blacks and a rank and file determined to preserve southern Democracy by excluding blacks This book looks at the ways that tension was expressed and ultimately resolved within the southern labor movement

Policy Making and Southern Distinctiveness John C. Morris,Martin K. Mayer,Robert C. Kenter,R. Bruce Anderson,2021-09-12 *Policy Making and Southern Distinctiveness* examines the uniqueness of southern politics and their policy choices While decades of scholarship on the politics of the American South have focused on partisanship and electoral outcomes as the primary elements of interest in southern politics few works have focused on the more practical outcomes of

these political processes specifically comparing state policy choices of southern states to non southern states This book examines six different policy arenas voting access gun control health care reproductive rights water and COVID 19 pandemic response comparing policy choices in states in the South with states in the non South The authors find that the South is distinct in several but not all of the policy arenas examined They conclude that the South as a region is unique because of the exceptional degree of one party control evident in the South coupled with a long standing preoccupation with partisanship and race based politics Policy Making and Southern Distinctiveness provides valuable insights into how and why states behave in the manner they do and where southern states may diverge from the rest of the country It will be of interest to scholars of southern politics state comparative policy public policy American politics and federalism intergovernmental relations

The Changing Racial Regime Matthew Holden, 2017-11-30 The National Political Science Review is the official publication of the National Conference of Black Political Scientists The Review's purpose as described by Matthew Holden in his introduction is to lead to new information insights and findings into the social and political status of African Americans The volume is not exclusionist or narrow It integrates essays that could stand alone as they initially were written according to the method and theory of the author in question As presented here however they also lend themselves to a broader treatment of race and the political order The present volume combines essays expressly focused on African Americans Africa and the African diaspora At the same time it contains essays about broad generic subjects such as budgeting and interest groups written with no explicit racial relevance Holden integrates these essays under the theme of the changing racial regime The integrating concept is the old word regime which political scientists have used in many situations before to define such more or less persistent though not necessarily permanent orders of precedence If no significant benefits and no significant burdens could be forecast by knowledge of the social identity called race then the regime could be seen as non racial In American experience the regime was at one time purposeful and sustained white advantage The white race and its preferential standing was central to virtually all institutional practice public and private The significant contemporary question is the degree of change in the racial regime Some proceed with the assumption that a large degree of change has occurred in the American political system The view of other contributors is that the system still sustains racial stratification In its very internal dialogue this volume presents a panorama of current work by political scientists African American and other on the character of the American political system Contributors include Cedric Robinson Charles Henry Edward J Muller Marjorie Lewis Katherine A Hinckley and Bette S Hill Nancy Haggard Gilson and Vernon Johnson The Changing Racial Regime is an essential resource for political scientists black studies specialists and scholars and policy analysts of race relations in the United States

Southern Political Party Activists John A. Clark, Charles L. Prysby, 2004-09-10 The South continues to be the most distinctive region in American politics Over the last half century Democratic dominance in the South has given way to the emergence of a truly competitive two party system that leans Republican in presidential elections In some ways the

region is increasingly like the rest of the country yet even the degree of change and the speed with which it occurred give the South a distinctive air The contributors to *Southern Political Party Activists* examine both the development of American political party organizations and the changing political character of the South focusing on grassroots party activists those who are involved in party organizations at the county level John A Clark is associate professor of political science at Western Michigan University Charles L Prysby is professor of political science at the University of North Carolina at Greensboro

Intergroup Conflicts and Their Resolution Daniel Bar-Tal, 2011-01-26 This book sheds an illuminating light into the psyche of people involved in macro level destructive intergroup conflicts It also describes the changes in the socio psychological repertoire that are necessary to ignite the peace process Finally it elaborates on the nature and the processes of peace building including conflict resolution and reconciliation
