The Dong People Of China A Hidden Civilization:

The Dong People of China Gail Rossi,1991 A photographic introduction to one of China's least known ethnic groups

The Kam People of China D. Norman Geary,2003 The Kam are still essentially a hidden people very little has been published in English about them This book aims to fill a gap in the English literature by providing a comprehensive introduction to Kam culture The conclusion looks to the future for the Kam people and their culture **Life in a Kam Village in Southwest China, 1930-1949** Chaoquan Ou,2007-10-31 Although this unique insider's account of minority life in China is clearly a book in itself it is also the sequel to the much acclaimed *The Kam People of China* Geary Ou and others 2003 It describes the hitherto scarcely researched culture of people from Xiangye village in an untravelled corner of Guizhou province Southwest China in the 20 years leading up to Liberation in 1949 Xiangye is a Kam Dong nationality village so the book highlights Kam culture of the 1930s and 1940s It is a fascinating and unparalleled study also offering exceptionally clear details of many aspects of material culture and social customs for example the work of rice farming cotton production and cooking beautifully illustrated with line drawings and photographs that should appeal to anyone interested in the Kam people China or in ethnology generally The author grew up in Xiangye and later became Professor of Anthropology at a university in Qinghai province The manuscript was first written in Chinese with the intention of having it translated into English for an outside readership **Encyclopedia of Stateless Nations** James B. Minahan,2016-08-01 This book addresses the numerous national movements of ethnic groups around the world seeking independence more self rule or autonomy movements that have proliferated exponentially in the 21st century In the last 15 years globalization religious radicalization economic changes endangered cultures and languages cultural suppression racial tensions and many other factors have stimulated the emergence of autonomy and independence movements in every corner of the world even in areas formerly considered immune to self government demands such as South America Researching the numerous ethnic groups seeking autonomy or independence worldwide previously required referencing many specialized publications This book makes this difficult to find information available in a single volume presented in a simple format accessible to everyone from high school readers to scholars in advanced studies programs The book provides an extensive update to Greenwood's *Encyclopedia of the Stateless Nations Ethnic and National Groups around the World* that was published more than a decade earlier Each ethnic group receives an alphabetically organized entry containing information such as alternate names population figures flag or flags geography history culture and languages All the information readers need to understand the motivating factors behind each movement and the current situation of each ethnic group is presented in a compact summary Fact boxes at the beginning of each entry enable students to quickly access key information and consistent entry structure makes for easy cross cultural comparisons **Architecture, Ritual and Cosmology in China** Xuemei Li,2023-05-31 Drawing on the author's extensive fieldwork in the Dong areas in southwest China this book presents a detailed picture of the

Dong's buildings and techniques with new insights into the Dong's cosmology and rituals of everyday life meshed with the architecture and the symbolic meanings. It examines how the buildings and techniques of the Dong are ordered and influenced by the local culture and context. The timber bridges and drum towers are the Dong's most prominent architectural monuments. Usually built elaborately with multiple roofs, these bridges and drum towers were designed and maintained by the local carpenters who also built the village suspended houses in an oral tradition carried down from father to son or to apprentice. They were funded entirely by the local people and the bridges tend to be built in places without great pressure of traffic or another bridge already existing close by. Why does such great expense go into the Dong's buildings with elaboration? How were they built? And what do they mean to their users and builders? This book is an anthropological study on the Dong's architecture and technique and it aims to contribute a discourse on the interdisciplinary research area. It is suitable for graduate and postgraduate readers. *Ethnic Groups of North, East, and Central Asia* James B. Minahan, 2014-02-10
