The Dream Society:

The Dream Society , Living Make-Belief: Thriving in a Dream Society Jim Dator, 2024-05-27 This book shows how multiple developments have caused the world to move from an information society to a dream society Ongoing social and technological forces are pushing us from a world of words rationality and truth into a world of images performance and make belief Rather than deny or reject this transformation this book argues that one should understand and embrace it as waves of new futures that the world must strive to surf for fame and fun As a political scientist and futurist the author also offers hints of new goals and forms of governance fit for a dream society as he demonstrates that all current systems are ineffective and dangerously obsolete This book is of great interest to political philosophers futures scientists sociologists and those interested in cultural studies Holding Worlds Together: Ethnographies of Knowing and Belonging , Studies of globalization tend to foreground movements mobilities or flows while structures that remain stable and unchanged are often ignored This volume foregrounds the latter Discarding the term globalization for analytic purposes this volume suggests that the significance of globalizing processes is best understood as an experiential imaginary and epistemological dimension in people s lives The authors explore how meaningful relations are made when the socially local is not necessarily the geographically near and how connections are made and unmade that reach beyond the specificity of time and place Finally this volume is about the ways knowledge and received wisdom are challenged and recast through processes of re scaling and how the understanding of locality and identity are transformed as a result *Storytelling* Christian Salmon, 2017-01-31 Politics is no longer the art of the possible but of the fictive Its aim is not to change the world as it exists but to affect the way that it is perceived In *Storytelling* Christian Salmon looks at the twenty first century hijacking of creative imagination anatomizing the timeless human desire for narrative form and how this desire is abused by the marketing mechanisms that bolster politicians and their products luxury brands trade on embellished histories managers tell stories to motivate employees soldiers in Iraq train on Hollywood conceived computer games and spin doctors construct political lives as if they were a folk epic This storytelling machine is masterfully unveiled by Salmon and is shown to be more effective and insidious as a means of oppression than anything dreamed up by Orwell **Weng** Jamaica Mann, 2007-10 WENG summarizes the author s experiences of twenty years in management training leading and his diligent pursuit of education With his arrival at the end of an intellectual rope he recognized that we are an untapped powerhouse of potentials In WENG he illustrates that Sophistication is not a requirement to be excellent Education does not equal success Experience is never the limit of the future Comfortable means we can perform better Growth is always working beyond the observable limits and Moving to the next level is the only option to being rendered irrelevant WENG uses illustrations and personal anecdotes to validate the values of personal introspection and discipline in our lives In WENG we learn that the limits of our intellectual capacity and academic learning are merely our beginning for achieving personal and collective wellbeing realizing the purpose of our life

and gaining an abundant harvest WENG is an account of coming to wits end and now moving on to achieve greatness The Fifth Narrative Benjamin Katz,2004-05 This book was written for bright brave and curious people who wish to become farsighted to find other meanings and necessities beyond our recent Grand Tales Religion Pessimism Capitalism and Science The Fifth Narrative is about our emergence out of our dung beetle state It reveals our unawareness that the dungballs which currently sustain us Grand Narratives constrain our ability to be farsighted thus endangering our future evolution It tells how human folly in our time seems more than ever to confound these grand stories and their bearing meaning It explains why a new grand Narrative is necessary in order to survive and prevail And why a new psychology encompassing areas like global ecology demography resources and politics is of impending necessity The book deals with the emergence of a new civilization through technology and farsighted knowledge which will form and guide our further evolution Its essential message is Let us become wiser ascending Icarus rising beyond our limiting schemes and perspectives *Jim Dator: A Noticer in Time* Jim Dator,2019-08-19 This book features a selection of the published writings and public presentations of Jim Dator Most of the chapters are directly concerned with futures studies and ideas about the futures The topic covers many disciplines and subjects It is also concerned with many different parts of the world even Mars In addition a few of the earlier papers contained here are about more conventional topics in politics and religion The collection spans a more than 50 year period of thought reflection and instruction In particular the papers examine six main topics These include meditations on the very nature of future studies visions of preferred futures ideas about alternative futures and details on future theories and methods Coverage also considers such specific topics as AI and robots the environment food culture energy families future generations and more Overall these papers help readers gain insight into what it takes to weave together alternative images of the future in useful ways They also reveal cross disciplinary patterns in key fields of human endeavor that will help readers better understand trends and emerging issues The Future of Eco-labelling Frieder Rubik,Paolo Frankl,2017-09-29 Eco labelling is one of the key tools used by policy makers in many parts of the world to encourage more sustainable production and consumption By providing environmental information on products and services eco labels address both business users and consumers and range from mandatory approaches such as required product declarations to voluntary approaches such as national eco labels Eco labels can play an important role in environmental policy They reward and promote environmentally superior goods and services and offer information on quality and performance with respect to issues such as health and energy consumption Eco labels fit well into a multi stakeholder policy framework as promulgated recently by the EU s integrated product policy IPP since the development of criteria for labels and the acceptance in the market requires the involvement of a wide range of different parties from government and business to consumers and environmental organisations However many eco labelling schemes have had troubled histories and questions have been raised about their effectiveness So are eco labels an effective tool to foster the development production sale and use of products and to provide

consumers with good information about the environmental impacts of those products Is eco labelling useful to business as a marketing tool What factors contribute to the development of successful schemes More than ten years after its establishment can the EU Flower be considered a success Are national eco labels such as the German Blue Angel and the Norwegian White Swan more effective Should eco labels be harmonised Are eco labels achieving their original aim of fostering sustainable production and consumption For which product groups are ISO type I eco labels appropriate and inappropriate Are other labels such as mandatory ISO type II and ISO type III labels more effective in some cases Are eco labels focusing on the main environmental policy targets or just on low hanging fruit Are eco labels really linked to other tools of IPP The Future of Eco labelling provides answers to all of these questions Based on a major EU research exercise the book plots a course for policy makers to address some of the historic problems with eco labelling to learn what works and what doesn't and to move forward with schemes that can make a real difference to sustainable production and consumption The book analyses the conditions under which eco labelling schemes both mandatory and voluntary are or can become an efficient and effective tool to achieve given objectives assesses previous experiences with eco labels in different European countries and the relationship of these schemes with business strategies IPP and market conditions defines strategies aimed at linking eco labels with other IPP measures explores how eco labels can be used to encourage sustainable consumption patterns create green markets foster innovation and development of green products and services and implement multi stakeholder initiatives and sets out detailed recommendations for the future of eco labelling The book will be required reading for policy makers businesses involved with eco labelling schemes and researchers interested in the development of sustainable production and consumption and IPP worldwide
