Cimbala,Peter Forster,2005-10-21 This study establishes that the political economic and military technological changes that transform the international system also alter the way in which a state views its and others responsibilities and burdens for responding to international crises It assesses the distribution of the costs of raising and supporting arms of service the risks of deploying them overseas and using them in combat or peace operations and the extent to which members have a responsibility for maintaining international order in the context of three instances of multinational military intervention the Multinational Force deployment in Lebanon in 1982 83 the first Persian Gulf War in 1990 91 and the UN and NATO intervention in Bosnia Herzegovina **Dynamics of change in nato; Burden-sharing perspectives** James R. NATO's existence *Sharing Security* M. Chalmers, 2016-04-30 *Sharing Security* is a unique and comprehensive study of a key yet often neglected feature of modern international society. It begins by assessing how political theory can contribute to an understanding of international burdensharing. It then analyses in turn why some Western states contribute more than others to common defences, the European Union budget and overseas development aid. It highlights the particular burdensharing problems involved in global regimes focusing on the UN's continuing financial crisis and the costs of combating global warming. It argues that today's burdensharing disparities continue to be shaped by the particular character of the international settlement at the end of the Second World War **Parameters**, 1990
