The Nature of Literary Response Clark McPhail, Norman Holland, 2017-09-20 In a rare fusion of literary sensibility with psychological research Norman N Holland brings to light important data showing how personality in the fullest sense of character development and identity affects the way in which we read and interpret literature This book will show that readers respond to literature in terms of their own lifestyle character personality or identity By such terms psychoanalytic writers mean an individual s characteristic way of dealing with the demands of outer and inner reality Each new experience develops the style while the pre existing style shapes each new experience The sub title of this book *Five Readers Reading* reflects the fact that the author a distinguished literary critic worked with five student readers using a battery of psychological tests and extensive interviews to study the ways they reacted to classic short stories by Faulkner Hemingway and others Combining his own interpretation of the stories with his understanding of the readers and their reactions Holland derives four principles that inform literary response He then goes on to show how these principles apply not just to literary response but to the way personality shapes any experience The book carries Holland s previous studies of creation and responsive recreation forward to a major theoretical statement He rejects the artificial idea that one must think of a text or other event as separate from its perceivers illustrating the dynamics by which perceiver and perceived mutually create an experience For critics and students of the psychology of human behavior this is challenging and seminal reading **The Nature of Literary Response** Clark McPhail, 2017 In a rare fusion of literary sensibility with psychological research Norman N Holland brings to light important data showing how personality in the fullest sense of character development and identity affects the way in which we read and interpret literature This book will show that readers respond to literature in terms of their own lifestyle character personality or identity By such terms psychoanalytic writers mean an individual s characteristic way of dealing with the demands of outer and inner reality Each new experience develops the style while the pre existing style shapes each new experience The sub title of this book *Five Readers Reading* reflects the fact that the author a distinguished literary critic worked with five student readers using a battery of psychological tests and extensive interviews to study the ways they reacted to classic short stories by Faulkner Hemingway and others Combining his own interpretation of the stories with his understanding of the readers and their reactions Holland derives four principles that inform literary response He then goes on to show how these principles apply not just to literary response but to the way

personality shapes any experience The book carries Holland's previous studies of creation and responsive recreation forward to a major theoretical statement He rejects the artificial idea that one must think of a text or other event as separate from its perceivers illustrating the dynamics by which perceiver and perceived mutually create an experience For critics and students of the psychology of human behavior this is challenging and seminal reading Provided by publisher Hermeneutic Desire and Critical Rewriting M. Cornis-Pope, 1991-12-01 Starting from a comprehensive examination of current poststructuralist and sociosemiotic theories of narrative this book formulates an interactive model of literary interpretation and pedagogy emphasising process critical self awareness and strategies of rereading rewriting A literary pedagogy premised on the concept of rewriting the author argues will enable readers to experience the process of narrative and critical construction creatively **Private Readings/public Texts** Kenneth Krauss, 1993 In this volume Kenneth Krauss maintains that if readers are to comprehend playscripts as plays they must imagine the theatre audience so vital to the staging of any script but conspicuously absent from the text itself Krauss examines what has been written about reading playscripts or playreading and proposes four possible ways founded on a reception oriented approach to theatre communication and spectator response that playreaders may construct a sense of theatre audiences *What is Narrative Criticism?* Mark Allan Powell, The first nontechnical description of the principles and procedures of narrative criticism Written for students and pastors use in their own exegesis With great clarity Powell outlines the principles and procedures that narrative critics follow in exegesis of gospel texts and explains concepts such as point of view narration irony and symbolism Chapters are devoted to each of the three principal elements of narrative events characters and settings and case studies are provided to illustrate how the method is applied in each instance The book concludes with an honest appraisal of the contribution that narrative criticism makes a consideration of objections that have been raised against the use of this method and a discussion of the hermeneutical implications this method raises for the church
