Skywriting An Aviation Anthology:

Skywriting, an Aviation Anthology James Gilbert, 1978-01-01 *Skywriting* James Gilbert, 1978-01-01 *The Cultures of Alternative Mobilities* Phillip Vannini, 2016-03-16

The Cultures of Alternative Mobilities presents a series of ethnographic studies focusing on the local cultures of mobilities and immobilities emphasizing the everyday sense of contingency and heterogeneity that accompanies them. Compensating for the excess of theory and criticism based on the notion of hypermobilities, this book sheds light on the nuanced differences and idiosyncrasies of mobility with a view to rediscovering meanings and lifestyles marked by movement and immobility. Original empirical and global case studies are presented by an international team of scholars exploring the complex negotiated and contingent nature of the social worlds of movement. By avoiding sweeping generalizations on the deeply connected and readily mobile nature of society as a whole, this volume sheds light on the diversity of mobility modes in an accessible and interdisciplinary form that will be of key interest to sociologists, geographers, and scholars of human mobility, communication, and culture.

The Flying Machine and Modern Literature Laurence Goldstein, 1986-11-22. This is the first work to survey the myths created by the modern literary imagination about technology. Herbert Sussman succeeds admirably, fascinatingly on all counts. American Literature, a landmark in the study of literary and technological history. NMAH, fascinating, a welcome addition to the growing scholarship about the impact of technology on the modern imagination. Journal of Modern Literature, Annual Review. This book chronicles precisely how the flying machine helped to create two kinds of apocalyptic modes in modern literature.

Human Factors of Outer Space Production T. Stephen Cheston, 2019-03-13. The missions of the early space age when a relatively few very highly trained, physically fit male pilot astronauts operated for short times will be supplemented in the future by missions where large numbers of nonpilot astronaut men and women will work in orbit for long periods of time on research and industry-related tasks. The lengthening and changing complexity of space operations requires that the psychosocial habitat design, food systems, and economic aspects of humans working in space be reviewed carefully. In this volume, an interdisciplinary group of experts addresses these aspects of space work and delineates avenues for future research.
