Devolution and Aging Policy Francis G Caro,Robert Morris *Deceased*,2012-10-12 Explore significantbut often overlookedaspects of aging policy This unique addition to the literature on aging policy will help you understand devolutionthe decentralizing of service provisionand the roles that state local government and private organizations now play in addressing the needs of our aging population It will show you how to initiate innovations and make positive changes in aging policy through state and local initiatives collaborations between the federal government and other government agencies public private collaboration and strictly private initiatives From the editors Around the world the ground rules are being questioned about the role of national governments in addressing domestic needs During the twentieth century in countries throughout the world central governments assumed major responsibilities for a wide variety of human needs Whether the concern was income security health housing or education interventions were premised upon convictions that a strong public sector role was essential and that major involvement of national governments was needed More recently a significant pattern devolution has emerged in many countries wherein these responsibilities have shifted away from national governments to regional and local governments as well as from the public to the private sector Thoughtfully divided into five sections that illustrate distinctly different forms of devolution this book first provides an essential overview of devolution and then examines its implications for vital aspects of service provision to the elderly In the United States in recent years the single greatest focus for devolution has been the transformation of income security protections for poor families The federal Aid to Families With Dependent Children program has been replaced by the Temporary Assistance to Needy Families program Devolution and Aging Policy examines that change and other important facets of the current climate of devolution including Medicaid financed long term care state sponsorship of services in retirement communities the implications of the Workforce Investment Act for the access of older workers to training at a state level to upgrade their work

The Common Law Tradition George Liebmann, 2017-09-04 This book commemorates a place and a time in American law teaching but more importantly an outlook the common law tradition That outlook was empirical and tolerant These values were carried into expression by a group of people who were not part of a cult or faction nor ruled by the herd instinct Now in paperback *The Common Law Tradition* is a collective portrait of five scholars who epitomize the tradition The focus is Chicago in the 1960s The five figures considered Edward H Levi Harry Kalven Jr Karl Llewellyn Philip Kurland and Kenneth Culp Davis did much to broaden the perspectives of the legal academy Levi made use of sociology economics and comparative law Kalven collaborated with sociologists on the Jury Project and with economists on tax law and auto compensation plans Llewellyn's commitment to empirical research underpinned his work on the Uniform Commercial Code Kurland's approach to constitutional law was highlighted by his insistence on the relevance of legal history Davis was an energetic comparativist in his work on administrative law What distinguished these Chicagoans is that their work was practical and rooted in the law and hence yielded concrete applications The group's diversity the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from today's legal scholars and make their ideas of continuing importance

Six Lost Leaders George W. Liebmann, 2001-01-01 In his new book George W Liebmann discusses the work of six largely forgotten figures Octavia Hill William Glyn Jones Mary Richmond George William Brown Mary Parker Follet and Bryan Keith Lucas Three are British three American Some came from affluent backgrounds some grew up poor One was barely educated another spent eleven years at some of the world's more prestigious institutions of higher learning What united them all was a shared conviction that citizenship involved more than voting that society consists of more than the marketplace or political institutions and that professional values are important for shaping a civil discourse With a sympathetic eye toward the fulfillment of these common aspirations Liebmann looks at the national health social work housing management and educational initiatives spearheaded by these powerful figures over the past two centuries This study is a fascinating retort to our cynical age of political disillusionment and an innovative contribution to social and political history

America's Political Inventors George W. Liebmann, 2017-12-11 Recent American political developments including the election of Donald Trump reveal profound disquiet with the highly centralized political regime based on discretionary allocation of funds and powers to interest groups that has developed since the creation of emergency institutions after America's entry into World War I This book demonstrates the effectiveness in American history of measures conceived in a different spirit addressing the population at large rather than particular interest groups relying on citizen and local initiative and founded not on the distribution of frequently unearned benefits and powers
