Decolonizing and Diversifying STEAM Education in Southern Africa: Frameworks and Pathways to Liberation Chikuvadze P., Makuvire C., Sunzuma G., Zezekwa N., 2025-05-17 In recent decades Science Technology Engineering the Arts and Mathematics STEAM education has been heralded globally as a driver of innovation economic growth and societal advancement Yet in Southern Africa and in many parts of the Global South STEAM education remains deeply entangled with colonial legacies Western centric frameworks and structural inequities that marginalize indigenous knowledge systems local histories and diverse identities This book Frameworks and Pathways to Liberation is an urgent response to the enduring problem This book represents the first of a two part journey that interrogates disrupts and reimagines STEAM education from the perspective of the oppressed It begins by laying a theoretical and philosophical foundation for a decolonial approach to STEAM learning one that is inclusive ethical and rooted in the lived realities of Southern African communities By foregrounding Indigenous Knowledge Systems culturally responsive pedagogies gender inclusivity and the social responsibilities of scientists and educators the chapters herein challenge the assumption that science and technology are neutral or universally beneficial At its core this book asks Whose knowledge counts in the classroom Whose voices are heard in the lab And how can education serve as a tool for liberation rather than domination The first chapter offers a conceptual framework for understanding STEAM education as a transformative force when it is critically examined and restructured Chapter Two builds upon this by exploring decolonization strategies that elevate indigenous epistemologies and question the dominance of Eurocentric curricula The third chapter turns to ethics highlighting the profound responsibilities that come with power in scientific practice and education Chapter Four illustrates how STEAM can be a vehicle for social justice providing case studies that inspire and instruct Finally Chapter Five focuses on gender addressing how identity and access are shaped by social and cultural dynamics that must be dismantled for true equity to emerge This book is intended for

educators curriculum designers policymakers researchers and activists committed to rethinking what STEAM education can be in contexts of historical oppression and ongoing struggle It invites readers to consider not just what is taught but how why and for whom Frameworks and Pathways to Liberation is both a critique and a call for action It is a recognition that to change the future of science and technology in Southern Africa we must first transform the way they are taught today

Transforming Southern African Agriculture Ann Willcox Seidman,1992 The South as an American Problem Larry J. Griffin,Don Harrison Doyle,1995 In this volume twelve authors take a challenging new look at the South Departing from the issue that has lately preoccupied observers of the South the region s waning cultural distinctiveness the contributors instead look at the dynamics of the region s long troubled relationship with the rest of the nation What they discover allows us all to view the current state and future course of the South as well as its link to the broader culture and polity in a new light To envision the concept of the Problem South and what it means to those within and without the region six historians have joined together with a sociologist an economist two literary scholars a legal scholar and a journalist Their essays which range in subject from the South s climate to its religious fundamentalism to its great outpouring of fiction and autobiography are the products of strong and independent minds that cut across disciplines disagree among themselves blend contemporary and historical insights and confront conventional wisdom and expedient generalities Although consensus among the contributors was never the goal of this collection some common themes do suggest themselves Above all there is not only a South defined by its geography history and society but also a mythic and metaphoric South one continually refashioned by national regional discourse trends and events In addition the South has long been a mirror in which America has viewed itself The nation has sought time and again to change the region but it has also used the South to expose and modify darker impulses of American culture **Theory, Change and Southern Africa** P. Vale,L. Swatuk,B. Oden,2001-06-26 As dramatic

changes unfold throughout the world and the new millennium begins many in South Africa have begun to ask what next The scale and pace of change have led to a feeling of powerlessness How to cope with globalization regionalization a depleting ozone layer new diseases rampant militarization let alone unseen structures of influence and oppression like race class and gender While there is no shortage of theoretical models on offer many feel that they are inadequate for the case of Southern Africa In this book scholars of both international relations and Southern Africa present a wide variety of thoughts on the future of the reign and the place of theory in helping us to understand the bewildering array of events characterizing the late modern early twenty first century world This book marks a call to theory if Southern Africans are to overcome the divisive legacy of the past and to move toward a more prosperous and sustainable collective future theory must be placed at the centre of everyday life For it is our understanding of the world that shapes both it and us Rural Development
