

INSTINCT THEORY OF MOTIVATION

The instinct theory of motivation argues that our motivational instincts are passed down from our parents through hereditary factors.

DEFINITION

The instinct theory states that our motivations and behavior are compelled by a distinct set of instincts that are internally fixed.

Our biological or natural urges are in control of how we act, and these are the motivating force behind our actions.

KEY CONCEPTS

- Motivation is predetermined by biological drives and not subject to change.
- Key drivers of our actions include the instincts to seek out food, shelter, and reproduction
- We lack agency because our innate drives – for food, shelter, protection, community, sex, etc. – cannot be denied.
