From Word to Life Perry Yoder, 2020-03-14 Few books on Bible study method both explain how and show how Fewer still seek to do this by utilizing current biblical scholarship while writing for informed lay people Virtually no books with the objective demonstrate a competent grasp of both the linguistic and historical school of biblical interpretation From Word to Life fills the gap with this distinctive contribution Written clearly it should enjoy wide usage especially in the classroom setting The book is not written for the beginner in Bible study its best use will be by those who having already started on the pilgrimage of Bible study are at least minimally acquainted with the historical critical method and have thought some about how language works Because of its clarity and scope it will reward both the serious student and the seasoned professor of biblical studies Willard M Swartley The inductive Bible study method presented in this book is motivated by three objectives The first is to show the reasonableness of the way biblical scholars work with the Bible A second motive is to present these methods or ways of study in such a manner that others can also appropriate them for their own use Third and perhaps most importantly it is hoped that through an acquaintance with good Bible study methodology discernment may be gained as to what constitutes valid and invalid uses and interpretations of Scripture Perry Yoder in the Preface Some Aspects of Text Grammars Teun A. van Dijk, 2015-04-28 No detailed description available for Some Aspects of Text Grammars

Petöfi, Hannes Rieser, 2012-12-06 If we consider how theoretical operations belonging to the methodological inventory of linguistics are carried out i.e. the way linguistic theories are set up three main criteria suggest themselves for

classifying them 1 Both nature and type of the aims of the scientific knowledge applied which allow to specify the epistemological interests as well as the theoretical impact constituting the purpose of linguistic operations 2 the nature of the intellectual procedures in connection with which a set of intersubjectively acceptable operations should guarantee that current postulates of the theory of science be maintained 3 the set of data serving as an empirical basis for the theories to be established on the one hand and as a correlate for the further development the testing and the evaluation of theories on the other hand It is to be considered a basic concept as well as a motive of current text linguistic research that due to the linguistic analysis of discourses a further development of linguistics has set in or is still to be achieved as regards the three criteria mentioned above Therefore if we want to estimate text linguistic approaches or concepts works methods or knowledge results we should take the view allowing for the general valuation of the linguistic discipline or one of its sub disciplines This should be done with respect to the contributions gathered in this volume as well
