## **Some British Empiricists In The Social Sciences 1650 19:**

**Some British Empiricists in the Social Sciences, 1650-1900** Richard Stone, 1997 This book describes the development of economic demographic and social statistics in the British Isles from the mid seventeenth century to the end of the nineteenth as represented by the work of twelve pioneers in these fields Its most distinctive feature is its tables which bring together in clear and succinct form an impressive body of data collected from a large number of disparate sources and are complemented by an exhaustive description of their historical context An important aspect of the book is the short biographies that open each chapter and bring to life the personalities of its central characters Statisticians of the Centuries P. Crepel, C.C. Heyde, S.E. Fienberg, E. Seneta, J. Gani, 2013-12-01 Statisticians of the Centuries aims to demonstrate the achievements of statistics to a broad audience and to commemorate the work of celebrated statisticians This is done through short biographies that put the statistical work in its historical and sociological context emphasizing contributions to science and society in the broadest terms rather than narrow technical achievement The discipline is treated from its earliest times and only individuals born prior to the 20th Century are included The volume arose through the initiative of the International Statistical Institute ISI the principal representative association for international statistics founded in 1885 Extensive consultations within the statistical community and with prominent members of ISI in particular led to the names of the 104 individuals who are included in the volume The biographies were contributed by 73 authors from across the world The editors are the well known statisticians Chris Heyde and Eugene Seneta Chris Heyde is Professor of Statistics at both Columbia University in New York and the Australian National University in Canberra He is also Director of the Center for Applied Probability at Columbia He has twice served as Vice President of the ISI and also as President of the ISI's Bernoulli Society Eugene Seneta is Professor of Mathematical Statistics at the University of Sydney and a Member of the ISI His historical writings focus on 19th Century France and the Russian Empire He has taught courses on the history of probability based statistics in U S universities Both editors are Fellows of the Australian Academy of Science and have at various times been awarded the Pitman Medal of the Statistical Society of Australia for their distinguished research contributions

**Development Centre Studies The World Economy Historical Statistics** Maddison Angus, 2003-09-25 Following on from his The World Economy a Millennial Perspective published by the OECD in 2001 in this book Angus Maddison offers a rare insight into the history and political influence of national accounts and national accounting **The Economic Thought of William Petty** Hugh Goodacre, 2018-05-11 William Petty 1623 1687 long recognised as a founding father of English political economy was actively involved in the military colonial administration of Ireland following its invasion by Oliver Cromwell and to the end of his days continued to devise schemes for securing England's continued domination of that country It was in that context that he elaborated his economic ideas which consequently reflect the world of military bureaucratic officialdom neo feudalism and colonialism he served This book shows that much of the theory and methodology

in use within the economics discipline of today has its roots in the writings of Petty and his contemporaries rather than in the supposedly universalistic and enlightened ideals of Adam Smith a century later Many of the fundamental ideas of today s development economics for example are shown to have been deployed by Petty explicitly for the purpose of furthering England s colonialist objectives while his pioneering writings on fiscal issues and national accounting theory were equally explicitly directed towards the raising of funds for England s predatory colonial and commercial wars This book argues that exploring the historical roots of economic ideas and methods in this way is an essential aspect of assessing their appropriateness and analytical power today and that this is more relevant than ever It will be of interest to advanced students and researchers in the history of economic thought early modern economic history development economics and economic geography

**Sociology as a Population Science** John H. Goldthorpe,2015-12-01 John Goldthorpe is one of Britain s most eminent sociologists and a strong advocate of quantitative sociology In this concise and accessible book he provides a new rationale for recent developments in sociology which focus on establishing and explaining probabilistic regularities in human populations Through these developments Goldthorpe shows how sociology has become more securely placed within the probabilistic revolution that has occurred over the last century in the natural and social sciences alike The central arguments of the book are illustrated with examples from different areas of sociology ranging from social stratification and the sociology of the family to the sociology of revolutions He concludes by considering the implications of these arguments for the proper boundaries of sociology for its relations with other disciplines and for its public role

**The Orders of Knighthood and the Formation of the British Honours System, 1660-1760** Antti Matikkala, 2008 Sheds considerable new light on the nature development and functions of the orders in a key phase of their history and goes a long way to explaining how such archaic institutions could flourish in a culture that is commonly thought anti traditional and especially hostile to the middle ages Professor JONATHAN BOULTON University of Notre Dame This is the first comprehensive study to set the British orders of knighthood properly into the context of the honours system by analysing their political social and cultural functions from the Restoration of the monarchy to the end of George II's reign It examines the revival of the Order of the Garter and the proposals to establish the Orders of the Royal Oak and the Esquires of the Martyred King at the Restoration the foundation 1687 and the revival 1703 4 of the Order of the Thistle as well as the foundation of the Order of the Bath 1725 It establishes just how central a part the orders played in the British high political life and its comprehensive and multidimensional approach carefully contrasts the idealistic discourse of virtue and honour to the real workings of the honours system it also makes the case for the Chivalric Enlightenment The

orders over the water the Garter and the Thistle conferred by the Jacobite claimants are discussed for the first time in the context of the established British honours system Overall the comparison between the socially very restricted British and the increasingly meritocratic Continental orders highlights the isolation of the British honours system from the European tendencies The Collected Works of Florence Nightingale: Florence Nightingale on society and politics, philosophy, science, education and literature Florence Nightingale,2003
