Anderson, 2006-09-28 Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference

The Thought Reader Craze Barry H. Wiley, 2012-10-06 Beginning in 1870 the hunger for scientific discovery in Great Britain drove prominent scientists philosophers and others to promote the legitimacy of telepathy At the same time mind

reading as a form of entertainment gained increasing popularity as persuasive performers like John Randall Brown W I Bishop and Stuart C Cumberland convinced reporters that they truly could read the thoughts of others The widely publicized sometimes bizarre interactions between scientists and these charlatans ushered in the Thought Reader Craze a period that lasted through about 1910 and saw entertainers make and lose fortunes and scientists make and lose reputations This volume explores this unusual cultural phenomenon showing how it was aided through the years by public scientific pronouncements astonishing performances by the thought readers and the rapidly changing industrial society

*Developments in the Histories of Sexualities* Chris Mounsey, 2013-04-11 *Developments in the Histories of Sexualities* In Search of the Normal 1600 1800 explores the oppositions created by the official exclusion of banned sexual practices and the resistance to that exclusion through widespread acceptance of those outlawed practices at an interpersonal level At different times and in different places state legislation sets up or tries to set up a normal by rejecting a particular practice or group of practices Yet this normal is derogated by popular practice since the banned acts themselves are thought at the grassroots level to be normal Among the events discussed in these essays are the Woods Pirie trial the Ladies of Llangollen the popular acceptance of fops and mollies and the press reaction to the discovery that James Allen was a woman who had lived successfully as a man and Lavinia Edwards was a man who had made her living as a female prostitute *Developments in the History of Sexualities* analyzes both the state language of bans and fiats about sexuality and the grassroots language which marks the acceptance of multiplicity in sexual practice Contributors benefit from the accumulation of new evidence of attitudes towards sexual practice and they engage with a wide range of texts including Ned Ward's *History of the Clubs* Tobias Smollett's *Roderick Random* Shakespeare's *Taming of the Shrew* and *The Tempest* Dryden's *All for Love* Anne Batten Crisall's *Poetical Sketches* Isaac de Benzerade's *Iphis et Iante* and Alessandro Verri's *Le Avventure di Saffo* **The Other World** Janet Oppenheim, 1985 A study of the public fascination with spiritualism and psychical research in Victorian and Edwardian times

*They Flew* Carlos M. N. Eire, 2023-09-26 An award winning historian's examination of impossible events at the dawn of modernity and of their enduring significance Accounts of seemingly impossible phenomena abounded in the early modern era tales of levitation bilocation and witchcraft even as skepticism atheism and empirical science were starting to supplant religious belief in the paranormal In this book Carlos Eire explores how a culture increasingly devoted to scientific thinking grappled with events deemed impossible by its leading intellectuals Eire observes how levitating saints and flying witches were as essential a component of early modern life as the religious turmoil of the age and as much a part of history as Newton's scientific discoveries Relying on an array of firsthand accounts and focusing on exceptionally impossible cases involving levitation bilocation witchcraft and demonic possession Eire challenges established assumptions about the redrawing of boundaries between the natural and supernatural that marked the transition to modernity Using as his case studies stories about St Teresa of Avila St Joseph of Cupertino the Venerable Mar a de Greda and three disgraced nuns Eire

challenges readers to imagine a world animated by a different understanding of reality and of the supernatural's relationship with the natural world. The questions he explores such as why and how impossibility is determined by cultural contexts and whether there is more to reality than meets the eye or can be observed by science have resonance and lessons for our time.

**Science of the Seance** Beth A. Robertson, 2016-11-28 In the 1920s and 30s people gathered in darkened rooms to explore the paranormal through seances. They were motivated by grief, spiritual devotion or a desire to be entertained. Beth A. Robertson resurrects the story of a small transnational group and their quest for objective knowledge of the supernatural, casting new light on how science, metaphysics and the senses collided to inform gendered norms in this era. Robertson draws back the curtain to reveal a world inhabited by researchers, spirits and spiritual mediums. Representing themselves as masters of the senses, untainted by the effeminized subjectivity of the body, psychical researchers in Canada, the UK and the US believed that they could use machines and empirical methods to transform the seance into a laboratory of the spirits and a transnational empirical project. However, mediums and ghostly subjects could and did challenge their claims to scientific expertise and authority.

**Laboratories of Faith** John Warne Monroe, 2018-07-05 At a fascinating moment in French intellectual history, an interest in matters occult was not equivalent to a rejection of scientific thought. Participants in seances and magic rituals were seekers after experimental data as well as spiritual truth. A young astronomy student wrote of his quest: "I am not in the presence or under the influence of any evil spirit. I study Spiritism as I study mathematics. He did not see himself as an ecstatic visionary but rather as a sober observer. For him, the darkened room of occult practice was as much laboratory as church. In an evocative history of alternative religious practices in France in the second half of the nineteenth and beginning of the twentieth centuries, John Warne Monroe tells the interconnected stories of three movements: Mesmerism, Spiritism and Occultism. Adherents of these groups, Monroe reveals, attempted to modernize faith by providing empirical support for metaphysical concepts. Instead of trusting theological speculation about the nature of the soul, these believers attempted to gather tangible evidence through Mesmeric experiments, seances and ceremonial magic. While few French people were active Mesmerists, Spiritists or Occultists, large segments of the educated general public were familiar with these movements and often regarded them as fascinating expressions of the modern condition, a notable contrast to the Catholicism and secular materialism that prevailed in their culture. Featuring eerie spirit photographs, amusing Daumier lithographs and a posthumous autograph from Voltaire as well as extensive documentary evidence, *Laboratories of Faith* gives readers a sense of what being in a seance or a secret society ritual might actually have felt like and why these feelings attracted participants. While they never achieved the transformation of human consciousness for which they strove, these thinkers and believers nevertheless pioneered a way of being religious that has become an enduring part of the Western cultural vocabulary.

**The Afterlife of Enclosure** Carolyn J. Lesjak, 2021-04-27 The enclosure of the commons space once available for communal use was not a singular event but an act of slow violence that transformed lands, labor and basic concepts of public

life leading into the nineteenth century The Afterlife of Enclosure examines three canonical British writers Charles Dickens George Eliot and Thomas Hardy as narrators of this history the long duration and diffuse effects of which required new literary forms to capture the lived experience of enclosure and its aftermath This study boldly reconceives the realist novel not as an outdated artifact but as witness to the material and environmental dispossession of enclosure and bearer of utopian energies These writers reinvented a commons committed to the collective nature of the social world Illuminating the common at the heart of the novel from common characters to commonplace events Carolyn Lesjak reveals an experimental figuration of the lost commons once a defining feature of the British landscape and political imaginary In the face of privatization climate change new enclosures and the other forms of slow violence unfolding globally today this book looks back to a literature of historical trauma and locates within it a radical path forward

**Icelandic Spiritualism** Loftur Reimar Gissurarson, 2018-01-16 Icelandic Spiritualism is an engaging social anthropological study of the place of spiritualism in Icelandic church and society during the first half of the twentieth century Challenging standard theoretical approaches to the study of religion the book contributes a wealth of data on the history of religion and psychical research presenting it in a vivid descriptive narrative The authors trace the role of the spirit world in Icelandic culture giving particular attention to the distinctive history of Iceland's conversion to Christianity They focus on the appearance of modern spiritualism as a distinct phenomenon in Icelandic life The book studies the interaction between various groups in fin de siècle Icelandic society not least in the state church as mediumistic phenomena became widely reported through the newspapers To some Icelandic spiritualism may be considered a deviant case of Protestantism What makes this book interesting however is that the spiritualism is seen as integral to Iceland's transition to modernity While Icelandic Spiritualism concentrates mainly on the first half of the twentieth century it also provides a summary of the continuation of spiritualist phenomena up to the current period This intriguing study will be of interest to theologians philosophers sociologists psychologists and anthropologists

**The Place of Enchantment** Alex Owen, 2006-12-15 By the end of the nineteenth century Victorians were seeking rational explanations for the world in which they lived The radical ideas of Charles Darwin had shaken traditional religious beliefs Sigmund Freud was developing his innovative models of the conscious and unconscious mind And anthropologist James George Frazer was subjecting magic myth and ritual to systematic inquiry Why then in this quintessentially modern moment did late Victorian and Edwardian men and women become absorbed by metaphysical quests heterodox spiritual encounters and occult experimentation In answering this question for the first time The Place of Enchantment breaks new ground in its consideration of the role of occultism in British culture prior to World War I Rescuing occultism from its status as an irrational indulgence and situating it at the center of British intellectual life Owen argues that an involvement with the occult was a leitmotif of the intellectual avant garde Carefully placing a serious engagement with esotericism squarely alongside revolutionary understandings of rationality and consciousness Owen demonstrates how a newly psychologized

magic operated in conjunction with the developing patterns of modern life She details such fascinating examples of occult practice as the sex magic of Aleister Crowley the pharmacological experimentation of W B Yeats and complex forms of astral clairvoyance as taught in secret and hierarchical magical societies like the Hermetic Order of the Golden Dawn Through a remarkable blend of theoretical discussion and intellectual history Owen has produced a work that moves far beyond a consideration of occultists and their world Bearing directly on our understanding of modernity her conclusions will force us to rethink the place of the irrational in modern culture An intelligent well argued and richly detailed work of cultural history that offers a substantial contribution to our understanding of Britain Nick Freeman Washington Times     *The Journal of the American Society for Psychical Research* American Society for Psychical Research,1990 List of members in v 1 6 12     *The Uncertain Element* Kay Dick,1950     *Journal of the American Society for Psychical Research* ,1990 List of members in v 1 6 12     **A Descriptive and Bibliographic Catalog of the Circus & Related Arts Collection at Illinois State University, Normal, Illinois** Milner Library,1976     **Proceedings of the Society for Psychical Research** Society for Psychical Research (Great Britain),1989     *The British Journal of Clinical Practice* ,1947     **The Golden Dawn Companion** R.
