Mangel, 1990-10-26 The seven articles in this volume are based on lectures presented at the annual symposium Some  
Mathematical Questions in Biology held in conjunction with the American Institute of Biological Sciences meeting in Toronto  
Ontario in August 1989 Sexual selection sex determination and sex allocation have been at the center of evolutionary ecology  
since its inception and have played an important role in the development of many concepts As this volume demonstrates  
many key questions remain to be investigated through a combination of empirical and theoretical work In addition questions  
of sex provide a natural mechanism for crossing the great taxonomic divide by allowing plant and animal researchers to focus  
on similar kinds of questions using a wide variety of organisms **Some Mathematical Questions in Biology, VIII** Simon

Aberdeen Scotland in September 1976 The proposal for a NATO School on the subject of Spatial Pattern in Plankton  
Communities was accepted by the Marine Science Panel and it was agreed that it be held at the Ettore Majorana Centre for  
Scientific Culture in Erice The Centre began in 1963 with an International School of Subnuclear Physics and has since  
developed to include courses in many other subjects which cover various fields of basic and applied research The original aim  
of the Centre was to create in Italy a cultural forum of high scientific standard which would allow young research workers to

appreciate problems currently of major interest in various fields of research     Geometries Of Nature, Living Systems And Human Cognition: New Interactions Of Mathematics With Natural Sciences And Humanities Luciano Boi, 2005-11-02 The collection of papers forming this volume is intended to provide a deeper study of some mathematical and physical subjects which are at the core of recent developments in the natural and living sciences The book explores some far reaching interfaces where mathematics theoretical physics and natural sciences seem to interact profoundly The main goal is to show that an accomplished movement of geometrisation has enabled the discovery of a great variety of amazing structures and behaviors in physical reality and in living matter The diverse group of expert mathematicians physicists and natural scientists present numerous new results and original ideas methods and techniques Both academic and interdisciplinary the book investigates a number of important connections between mathematics theoretical physics and natural sciences including biology     *Use Of Models Soc Science* Lyndhurst Collins, 2019-07-23 This book deals with the philosophy of model use focuses on the role of models in the natural sciences and introduces a new paradigm to the social sciences catastrophe model It outlines the role of models concerned with conflict problems particularly problems of military strategy     *Nonlinear Oscillations in Biology* F. **Problems in Resource Management and Epidemiology** Carlos Castillo-Chavez, Simon A. Levin, Christine A.

Shoemaker, 2013-03-08 Increasingly mathematical methods are being used to advantage in addressing the problems facing humanity in managing its environment Problems in resource management and epidemiology especially have demonstrated the utility of quantitative modeling To explore these approaches the Center of Applied Mathematics at Cornell University organized a conference in Fall 1987 with the objective of surveying and assessing the state of the art This volume records the proceedings of that conference Underlying virtually all of these studies are models of population growth from individual cells to large vertebrates Cell population growth presents the simplest of systems for study and is of fundamental importance in its own right for a variety of medical and environmental applications In Part I of this volume Michael Shuler describes computer models of individual cells and cell populations and Frank Hoppensteadt discusses the synchronization of bacterial culture growth Together these provide a valuable introduction to mathematical cell biology
