**Some People and Places in Irish Science and Technology** R. Charles Mollan, 1985-01-01 We are all aware of Ireland's literary past but it seems to have been assumed that we have produced no scientific equivalent of Joyce or Yeats. It may come as a surprise to many readers that there have been numerous Irish scientists and technologists who in their time made fundamental contributions to the advancement of knowledge. Many of these people were every bit as interesting as their literary counterparts and enjoyed the cut and thrust of scientific controversy. This booklet draws together for the first time brief portraits of Irish people and places involved in the forefront of science. It provides a historical link between current and future developments in Irish science and our neglected scientific heritage. It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (18210-1897) to John Stewart Bell (1928-1990) Charles Mollan, 2007-11-15

Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context. Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science. Well received in Irish and international reviews. *Nature in Ireland* John Wilson Foster, Helena C. G. Chesney, 1998 How has Irish nature been studied? How has it been expressed in literature and popular culture? How has it influenced and been influenced by political economic and social change? These long neglected questions are pursued in *Nature in Ireland* a pioneering collection of original essays by leading naturalists science writers and cultural historians who bring us from the geological prehistory of Ireland to the environmental threats of the late twentieth century. Knowing Their Place? Brendan Walsh, Pam Hirsch, 2014-09-01 Knowing their Place is a comprehensive account of the public private and intellectual life of Irish women in the Victorian age. In particular this book looks at the steady progress of girls and women within the education system their gradual involvement in intellectual life through amateur societies such as the Royal Dublin Society their emergence of independent highly motivated scholarly and philanthropic individuals who operated within local spheres with often very considerable degrees of success and influence.

**Physicists of Ireland** Mark McCartney, Andrew Whitaker, 2003-09-15 Demonstrating the strength of tradition in Ireland *Physicists of Ireland* Passion and Precision is a collection of essays on leading figures from the history of physics in Ireland. It includes physicists born outside of Ireland who carried out significant work in Ireland as well as those who had strong Irish roots but carried out their work outside. *The Making of Irish Geology 1740-1940* Patrick N. Wyse Jackson, 2025-03-31 Ireland has long been the focus of research into its geological foundations and history. This book provides insights into the evolution of geological ideas in Ireland, gives assessments of underrepresented scientists and offers an appreciation of the value of geological collections for historical research. Through a series of twenty-two papers, this volume provides syntheses and analyses of aspects of this geological research and places the role of a number of individuals firmly within context. The

topics discussed include the considerations of the nature of igneous rocks aspects of geological mapping of the country the role played by Irish scientists in determining the age of the Earth and the importance of early mineralogical and geological collectors and the role their collections made to advancing geological knowledge both in Ireland and Europe The Making of Irish Geology 1740 1940 will appeal to both the general and academic reader interested in the development of the geological sciences with a particular focus on Ireland

**Magnificent Women and their Revolutionary Machines** Henrietta Heald, 2019-09-19 Women have won their political independence Now is the time for them to achieve their economic freedom too This was the great rallying cry of the pioneers who in 1919 created the Women s Engineering Society Spearheaded by Katharine and Rachel Parsons a powerful mother and daughter duo and Caroline Haslett whose mission was to liberate women from domestic drudgery it was the world s first professional organisation dedicated to the campaign for women s rights Magnificent Women and their Revolutionary Machines tells the stories of the women at the heart of this group from their success in fanning the flames of a social revolution to their significant achievements in engineering and technology It centres on the parallel but contrasting lives of the two main protagonists Rachel Parsons and Caroline Haslett one born to privilege and riches whose life ended in dramatic tragedy the other who rose from humble roots to become the leading professional woman of her age and mistress of the thrilling new power of the twentieth century electricity In this fascinating book acclaimed biographer Henrietta Heald also illuminates the era in which the society was founded From the moment when women in Britain were allowed to vote for the first time and to stand for Parliament she charts the changing attitudes to women s rights both in society and in the workplace

*The Role of Women in the History of Geology* Cynthia V. Burek, Bettie Higgs, Geological Society of London, 2007 This book is a first as it unravels the diverse roles women have played in the history and development of geology as a science predominantly in the UK Ireland and Australia and selectively in Germany Russia and US The volume covers the period from the late eighteenth century to the present day and shows how the roles that women have played changed with time These included illustrators museum collectors and curators educationalists researchers and geologists Originally as wives sisters or mothers many were assistants to their male relatives This book looks at all these forgotten women and for the first time historians and scientists together explore the contribution they made to this male dominated subject

**Women and Science, 17th Century to Present** Véronique Molinari, 2011-05-25 If women s interest and participation in the advancement of science has a long history the academic study of their contributions is a far more recent phenomenon to be placed in the wake of second wave feminism in the 1970s and the advent of women s studies which have since then given impetus to research on female figures in specific fields or more generally speaking on women s battles to gain access to knowledge education and recognition in the scientific world These studies while providing a useful insight into the contributions of a few more or less well known figures have mostly focused however on the obstacles that women have had to overcome in the field of education and employment or in their

quest for acknowledgement by their male peers The aim of this volume is to try and approach the issue from a different and more comprehensive point of view taking into account not only the position of women in science but also the link between women and science through the analysis of various kinds of discourse and representation such as the press poetry fiction biographies and autobiographies or professional journals including that of women themselves The questions of the presentation or re presentation of science by women are thus at the core of this study as well as that of the portrayal and self portrayal of women in the sciences whether in the educational or the professional field A final part examines how women are represented in science fiction which like science itself has traditionally been a field dominated by men

**A New History of Ireland** Theodore William Moody, Francis X. Martin, Francis John Byrne, 1976 A New History of Ireland in nine volumes provides a comprehensive new synthesis of modern scholarship on every aspect of Irish history and prehistory from the earliest geological and archaeological evidence through the middle ages down to the present day Back cover

Irish National Inventory of Historic Scientific Instruments Charles Mollan, 1995-11-15 Carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about collections which have since been lost sold or otherwise dispersed

Joyce's Revenge Andrew Gibson, 2002-06-06 The Ireland of Ulysses was still a part of Britain This book is the first comprehensive historical study of Joyce's great novel in the context of Anglo Irish political and cultural relations in the period 1880 1920 The first forty years of Joyce's life also witnessed the emergence of what historians now call English cultural nationalism This formation was perceptible in a wide range of different discourses Ulysses engages with many of them In doing so it resists transforms and works to transcend the effects of British rule in Ireland The novel was written in the years leading up to Irish independence It is powered by both a will to freedom and a will to justice But the two do not always coincide and Joyce does not place his art in the service of any existing political cause His struggle for independence has its own distinctive mode The result is a unique work of liberation and revenge

*The Oxford History of the Irish Book, Volume IV* James H.

Murphy,2011-09 Volume IV The Irish Book in English 1800 1891 details the story of the book in Ireland during the nineteenth century when Ireland was integrated into the United Kingdom The chapters in this volume explore book production and distribution and the differing of ways in which publishing existed in Dublin Belfast and the provinces

Smyllie's Ireland Caleb Wood Richardson,2019-04-24 A thoughtful superbly researched and elegantly written study of one the most important pioneering Irish newspaper editors of the past 150 years Journal of British Studies As Irish republicans sought to rid the country of British rule and influence in the early twentieth century a clear delineation was made between what was authentically Irish and what was considered to be English influence As a member of the Anglo Irish elite who inhabited a precarious identity somewhere in between Irish Times editor R M Smyllie found himself having to navigate the painful experience of being made to feel an outsider in his own homeland In this engaging consideration of a bombastic outspoken and conflicted man Caleb Wood Richardson offers a way of seeing Smyllie as representative of the larger Anglo Irish experience Richardson explores Smyllie s experience in a German internment camp in World War I his foreign correspondence work for the Irish Times at the Paris Peace Conference and his guiding hand as an advocate for culture and intellectualism Smyllie had a direct influence on the careers of writers such as Patrick Kavanagh and Louis MacNeice and his surprising decision to include an Irish language column in the paper had an enormous impact on the career of novelist Flann O'Brien Smyllie like many of his class felt a strong political connection to England at the same time as he had enduring cultural dedications to Ireland How Smyllie and his generation navigated the collision of identities and allegiances helped to define what Ireland is today Describes the rich history of Irish Protestants who found themselves aliens in their own land Communication Booknotes Quarterly **Seek the Frozen Lands** Frank Nugent,2013-09-15 High on any list of Polar explorers would be the names Crozier McClintock McClure and Shackleton But how many know they were all Irish Seek the Frozen Lands unveils an array of Irish heroes largely unknown in modern Ireland The saga begins with Edward Bransfield who made one of the first sightings of the Antarctic in 1820 The story ends with the heroic age of Antarctic exploration and the burial of Shackleton in 1922 in South Georgia Truly a story of heroism drama and tragedy Similar to Tom Crean An Unsung Hero Captain Francis Crozier Last Man Standing Everest Calling Ger McDonnell His Life and His Death on K2 Saothar ,1987 *Archives of Natural History* ,1991
