Some Challenges In Contemporary Archaeology:

Some Challenges in Contemporary Archaeology John C. Barrett, 1995 Archaeology is a diverse discipline it operates through a number of institutional arrangements each of which has a particular agenda and set of agreed working practices Diversity might be regarded as a strength reflecting the dynamism with which archaeological concerns have become a widely used currency in our modern world But if we accept that diversity exists in a single discipline we might also wonder what defines the common ground what is it that at the end of the day continues to make us all archaeologists The second Oxbow Lecture presents the text of a lecture delivered in 1995 at the Institute of Field Archaeologists annual Archaeology in Britain Conference and explores the current state and priorities of British archaeology **The Oxford Handbook of Public**

Archaeology Robin Skeates, Carol McDavid, John Carman, 2012-01-05 Divided into four distinct sections and drawing across various disciplines this volume seeks to reappraise the place of archaeology in the contemporary world by providing a series of essays that critically engage with both old and current debates in the field of public archaeology **Companion to Historiography** Michael Bentley, 2006-02-27 The Companion to Historiography is an original analysis of the moods and trends in historical writing throughout its phases of development and explores the assumptions and procedures that have formed the creation of historical perspectives Contributed by a distinguished panel of academics each essay conveys in direct jargon free language a genuinely international wide angled view of the ideas traditions and institutions that lie behind the contemporary urgency of world history Archaeological Theory and Scientific Practice Andrew Jones, 2001-12-06 Is

archaeology an art or a science This question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals

The Archaeology of Britain John Hunter, Ian Ralston, 2002-03-11 A comprehensive and up to date introduction to all the archaeological periods covering Britain from early prehistory to the industrial revolution It provides a one stop textbook for the entire archaeology of Britain *Critical Traditions in Contemporary Archaeology* Valerie Pinsky, Alison Wylie, 1989

Participating in the Knowledge Society R. Finnegan, 2005-09-27 In current debates about the knowledge society and the organization of research the spotlight is most often on the universities This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the

academy from seventeenth century north country astronomers to Victorian naturalists to today's think tanks community historians and new forms of researching and publishing through the internet These intriguing cases raise challenging issues about the location definition and validation of research about active participation in knowledge generation and about the perhaps changing boundaries of university today

Far from Equilibrium: An archaeology of energy, life and humanity Michael J. Boyd, Roger C. P. Doonan, 2021-03-03 Archaeology is in crisis Spatial turns material turns and the ontological turn have directed the discipline away from its hard won battle to find humanity in the past Meanwhile popularised science camouflaged as archaeology produces shock headlines built on ancient DNA that reduce humanity's most intriguing historical problems to two dimensional caricatures Today archaeology finds itself less able than ever to proclaim its relevance to the modern world This volume foregrounds the relevance of the scholarship of John Barrett to this crisis Twenty four writers representing three generations of archaeologists scrutinise the current turmoil in the discipline and highlight the resolutions that may be found through Barrett's analytical framework Topics include archaeology and the senses the continuing problem of the archaeological record practice discourse and agency reorienting archaeological field practice the question of different expressions of human diversity and material ecologies Understanding archaeology as both a universal and highly specific discipline case studies range from the Aegean to Orkney and encompass Anatolia Korea Romania United Kingdom and the very nature of the Universe itself This critical examination of John Barrett's contribution to archaeology is simultaneously a response to his urgent call to arms to reorient archaeology in the service of humanity

Nigerian Cultural History and Challenges of Postcolonial Development Aderemi Suleiman Ajala, Samuel Oluwale Ogundele, 2023-04-05 An inspiring editorial analysis and interpretation of aspects of Nigerian history culture and politics from mankind's archaeological past to ethnographic present this book contextualises cultural history as instrument of sustainable development in postcolonial Nigeria Nigeria's rich cultural history defines its physical environment cultural diversities early industrial technology and even its various challenges of development Yet little is achieved in engaging cultural history as cultural experience for the country's development The gains of cultural history as a mirror of the past and inspiration for development is ignored This difficulty in harnessing the potential for development in Nigeria found in the country's cultural history leaves us vulnerable to repeating past mistakes The book is accessible and aimed at giving the readers a unique and expansive understanding of history cultural knowledge and their applications in Nigerian postcolonial development agendas This makes the book essential for scholars of anthropology archaeology history linguistics sociology political science and geography as well as policy makers

Paradigm Found Kristian Kristiansen, Ladislav Šmejda, Jan Turek, 2015-01-21 Paradigm Found brings together papers by renowned researchers from across Europe Asia and America to discuss a selection of pressing issues in current archaeological theory and method The book also reviews the effects and potential of various theoretical stances in the context of prehistoric archaeology The 23 papers provide a discussion of the

issues currently re appearing in the focal point of theoretical debates in archaeology such as the role of the discipline in the present day society problems of interpretation in archaeology approaches to the study of social evolution as well as current insights into issues in classification and construction of typologies Taking a fresh and often provocative look at the challenges contemporary archaeology is facing the contributors evaluate the effects of past developments and discuss the impact they are likely to have on future directions in archaeology as an internationally connected discipline In its final part the volume reflects on current thinking on prehistory using case studies from a number of European regions and the Mediterranean from the Neolithic to the Roman Period The volume represents a tribute to the lifetime achievements of Professor Ev en Neustupn a distinguished Czech archaeologist who contributed to the advancement of prehistoric studies in Europe and to archaeological theory and method in particular

Making Places In The Prehistoric World Joanna Bruck,Melissa Goodman,2023-04-28 First published in 1999 This groundbreaking volume addresses issues central to the study of prehistoric settlement including group memory the transmission of ideology and the impact of mobility and seasonality on the construction of social identity Building on these themes the contributors point to new ways of understanding the relationship between settlement and landscape by replacing Capitalist models of spatial relations with more intimate histories of place

The Archaeology of Contemporary America William R. Caraher,2024-03-05 This book provides a survey of contemporary archaeology in the United States demonstrating the plurality of theoretical and methodological approaches that make this discipline in the US unique

Education and the Historic Environment Donald Henson,Peter G. Stone,Mike Corbishley,2004 Examining evidence case studies and chapters from a wide cross section of the heritage sector this book is practical inspiring and instructive while emphasizing the contribution to both education and heritage that results from a positive relationship between the two disciplines

Wicked Problems for Archaeologists John Schofield,2024-05-01 Wicked Problems are those problems facing the planet and its inhabitants present and future which are hard if not impossible to resolve and for which bold creative and messy solutions are typically required The adjective wicked describes the mischievous and even evil quality of these problems where proposed solutions often turn out to be worse than the symptoms This wide ranging and innovative book encourages readers to think about archaeology in an entirely new way as fresh relevant and future oriented It examines some of the novel ways that archaeology alongside cultural heritage practice can contribute to resolving some of the world s most wicked problems or global challenges as they are sometimes known With chapters covering climate change environmental pollution health and wellbeing social injustice and conflict the book uses many and diverse examples to explain how through studying the past and present through an archaeological lens in ways that are creative ambitious and both inter and transdisciplinary significant small wins can be achieved Through these small wins archaeologists can help to mitigate some of those most pressing of wicked problems contributing therefore to a safer healthier and more stable world

Gender Trouble and Current Archaeological Debates Uroš Matić,Bisserka

Gaydarska, Laura Coltofean, Marta Díaz-Guardamino, 2024-10-28 This volume challenges the status quo by addressing a selection of intensely discussed themes in contemporary archaeological practice from a gender perspective. It aims to demonstrate that gender is intrinsic to archaeology and that gender archaeology can enrich our studies irrespective of the discipline's possible future directions and so-called paradigm shifts. The scholarly contributions commissioned for this volume critically discuss and reflect on a wide range of concepts, ideas, principles, and theories presently applied in archaeology within the framework of gender. The chapters included in the first part deal with themes in world archaeology that have little or no focus on gender, such as the Third Science Revolution, e.g., ancient DNA, stable isotopes, analyses, big data, posthumanism, e.g., new materialism, symmetrical archaeology, and the ontological turn, and digital archaeology and heritage. The second part focuses on themes in which gender archaeology has made serious advances: intersectionality, social inequality, violence, mobility. The third part deals with themes crucial for contemporary archaeology and society, namely gender education, gender representation in museum exhibitions, and the future of gender archaeology. The volume concludes with a coda chapter that critically assesses the preceding contributions and the volume as a whole. The book offers a gender-balanced and inclusive authorship consisting of both well-established and early career researchers closely connected to the EAA, whose professionally, culturally, and geographically diverse backgrounds and experiences enrich the viewpoints discussed in the chapters. The targeted audience is archaeologists from all theoretical and scientific backgrounds at all stages of their career. Chapter 2, Sex, Gender, and the Third Science Revolution, is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. *An Upland Biography* John Barnatt, Bill Bevan, Mark Edmonds, 2017-02-28 Gardom's Edge is an area of gritstone upland situated on the Eastern Moors of the Derbyshire Peak District. Like other parts of the Eastern Moors, Gardom's Edge has long been renowned for the wealth of prehistoric field systems, cairns, and other structures which can still be traced across the surface. Drawing on the results of original survey and excavation, *An Upland Biography* documents prehistoric activity across this area, exploring the changing character of occupation from the Mesolithic to the Iron Age. It also tacks back and forth between local detail and regional patterns to better understand the broader social worlds in which Gardom's Edge was set. *The Archaeology of Burning Man* Carolyn L. White, 2020-04-15 Each August, staff and volunteers begin to construct Black Rock City, a temporary city located in the hostile and haunting Black Rock Desert of northwestern Nevada. Every September, nearly seventy thousand people occupy the city for Burning Man, an event that creates the sixth largest population center in Nevada. By mid-September, the infrastructure that supported the community is fully dismantled, and by October, the land on which the city lay is scrubbed of evidence of its existence. *The Archaeology of Burning Man* examines this process of building, occupation, and destruction. For nearly a decade, Carolyn L. White has employed archaeological methods to analyze the various aspects of life and community in and around Burning Man and Black Rock City. With a syncretic approach, this work in active site archaeology provides both a theoretical basis and a practical

demonstration of the potential of this new field to reexamine the most fundamental conceptions in the social sciences

Topical Issues of Rational use of Natural Resources 2019 Vladimir Litvinenko, 2022-07-30 *Topical Issues of Rational Use of Natural Resources 2019* contains the contributions presented at the XV International Forum Contest of Students and Young Researchers under the auspices of UNESCO St Petersburg Mining University Russia 13 17 May 2019 The Forum Contest is a great opportunity for young researchers to present their work to the academics involved or interested the area of extraction and processing of natural resources The topics of the book include Volume 1 Geotechnologies of resource extraction current challenges and prospects Solid minerals mining technologies Industrial and labour safety Underground space development technologies Rock mechanics and control of rock conditions Cutting edge technologies of geological mapping search and prospecting of mineral deposits Digital and energy saving technologies in mineral resource complex Volume 2 Breakthrough technologies of integrated processing of mineral hydrocarbon and technogenic raw materials with further production of new generation materials The latest management and financing solutions for the development of mineral resources sector Environment protection and sustainable nature management New approaches to resolving hydrocarbon sector specific issues *Topical Issues of Rational Use of Natural Resources 2019* collects the best reports presented at the Forum Contest and is of interest to academics and professionals involved in the extraction and processing of natural resources

Past Meets Present John H. Jameson, Sherene Baugher, 2007-04-17 In the face of an increasing public interest and demand for information archaeologists are starting to collaborate with historians educators interpreters museum curators exhibit designers landscape architects and other cultural resource specialists to devise the best strategies for translating an explosion of archaeological information for the public In turn some communities are partnering with archaeologists to become active players in the excavation interpretation and preservation of their heritage The last decade has witnessed numerous applications of public interpretation and outreach models and an increased interest in establishing partnerships between professional practitioners in public interpretation and educational institutions such as museums and schools These developments have occurred in the context of a realization that community based partnerships are the most effective mechanism for long term success It is clear that there is a need for a volume that addresses these latest trends and provides case studies of successful partnerships
