## Some Dark Antiquities:

*Some Dark Antiquities* William Ardin, 1994      The Archaeology of Darkness Marion Dowd, Robert Hensey, 2016-05-31

Through time people have lived with darkness Archaeology shows us that over the whole human journey people have sought out dark places for burials for votive deposition and sometimes for retreat or religious ritual away from the wider community Thirteen papers explore Palaeolithic use of deep caves in Europe and the orientation of mortuary monuments in the Neolithic and Bronze Age It examines how the senses are affected in caves and monuments that were used for ritual activities from Bronze Age miners in Wales working in dangerous subterranean settings to initiands in Italian caves to a modern caver's experience of spending time in the one of the world's deepest caves in Russia We see how darkness was and is viewed at northern latitudes where parts of the year are spent in eternal night and in Easter Island where darkness provided communal refuge from the pervasive sun We know that spending extended periods in darkness and silence can affect one physically emotionally and spiritually How did interactions between people and darkness affect individuals in the past and how were they regarded by their communities And how did this interaction transform places in the landscape As the ever increasing electrification of the planet steadily minimizes the amount of darkness in our lives curiously darkness is coming more into focus This first collection of papers on the subject begins a conversation about the role of darkness in human experience through time

provides an irenic and balanced perspective on these issues showing how texts and artifacts are in a fascinating dialogue with one another that sheds light on the meaning and importance of both. What emerges is a rich and complex picture that enlivens our understanding of the Bible's message, increases our appreciation for the historical and cultural contexts in which it was written, and helps us be realistic about the limits of our knowledge.

**The Wide Lens in Archaeology** Allan Gilbert, Justin Lev-Tov, Paula Wapnish, 2017-06-01. This book honors the memory of Brian Hesse, a scholar of Near Eastern archaeology, a writer of alliterative and punned publication titles, and an accomplished amateur photographer. Hesse specialized in zooarchaeology but he influenced a wider range of excavators and ancient historians with his broad interpretive reach. He spent much of his career analyzing faunal materials from different countries in the Middle East, including Iran, Yemen, and Israel, and his publications covered themes particular to animal bone studies such as domestication, ancient market economics, as well as broader themes such as determining ethnicity in archaeology. The essays in this volume reflect the breadth of his interests. Most chapters share an Old World geographic setting, focusing either on Europe or the Middle East. The topics are diverse, with the majority discussing animal bones, as was Hesse's specialization, but some take a nonfaunal perspective related to the problems with which Hesse grappled. The volume is also broad in temporal scope, ranging from Neolithic Iran to early Medieval England, and it addresses theoretical matters as well as methodological innovations, including taphonomy and the history of computers in zooarchaeology. Several of the essays are direct revisits to inspirations from or extensions of Hesse's own research. All the contributions reflect his intense interest in social questions about antiquity; the theme of social archaeology informed much of Brian Hesse's thinking, and it is why his work made such an impact on those working outside his own disciplinary research.
