in gardens around the British Isles Even the smallest garden attracts some birdlife and watching garden birds is a great joy for all nature lovers especially those who cannot travel as widely as they might like Garden birdwatchers are often new to birdwatching and can feel daunted by the array of species covered in even a small field guide to British birds This beautiful book focuses wholly on birds that are frequent garden visitors to the UK and reveals details of how they live how you can bring them into your garden and boost their survival and breeding success and how to identify them It is divided into logical categories for the non expert Forty seven garden bird species are treated in detail over two or four pages with more extended accounts for the most widely observed garden species Marianne Taylor looks at each species life history behaviour and breeding habits advising how to attract and support each bird in your garden as well as sorting out all common identification conundrums Chapters are interspersed with spreads on general practicalities of garden birdwatching and managing a wildlife garden More than 200 spectacular photographs will reveal every detail of our garden birds appearance and behaviour and side by side images are included for more difficult to identify species The final chapter deals with birds that are welcome but less regular visitors and encourages readers to venture into the wider world of birdwatching What Birdo is that? Libby Robin,2023-05-30 The idea that a bird is good news and needs all our support is probably the only thing amateur birdos professional zoologists and birdscapers people who redesign their gardens to support birdlife have in common But together they form a conservation community that cares about the future of birds and their habitats who are working to heal the damage wrought by those who don t notice birds What Birdo is That reveals how bird people in Australia have gone about their craft across the years Its stories come from wild places at sea as well as on the land from dusty archives from restoration projects gardens and urban wastelands They are human stories but the birds themselves interject and interrupt any self important anthropocentrism They educate They counter the imperialism of the ever expanding economies of the new millennium They turn up in unexpected places giving surprise and joy This field guide to Australia s bird people provides a basis for understanding the complex relationship between people and birds in a land of extremes at the forefront of changing climate and habitats **Some garden birds of south-east Australia, by T.
