

A person is standing on a dark, grassy hill at night, looking up at the sky. The sky is filled with stars and the Milky Way galaxy is visible, stretching across the upper half of the image. The person is silhouetted against the bright, starry background. The overall mood is contemplative and awe-inspiring.

It is easy to live with  
someone of value than  
someone famous.

## Someone Of Value:

Value-- and what Follows Joel Kupperman,1999 How can we know what is worth seeking or avoiding in life Is there anything to know If so is it in some sense personal This fresh and engaging work by noted philosopher Joel Kupperman addresses these questions as it examines the epistemology of value Kupperman looks first at how judgments of values manifest themselves whether there can be evidence for them and whether a realistic account is appropriate Focusing on emotional states he rejects the notion that there is one primary value arguing instead for a pluralistic understanding of value He contends that value is strongly contextual the value of a particular set of experiences in one s life can depend heavily on how they fit in with or provide contrast to other elements Kupperman argues both for a realistic account of value some things really do have a value about which we can have reasonable confidence and for skepticism about how much we can actually know about value The study moves on to explore the relations between judgments of value and moral or social policy decisions of how we should behave Acknowledging strong objections to the attempt by any group to impose its vision of a good life in a pluralistic society Kupperman nevertheless argues that proper attention to value leads to perfectionism in social policy Emphasizing the importance of detail in ethics he focuses on variations among cases and examines the weight cultural values can have in the social policy of a liberal society Going further than previous works in determining what counts as evidence for a judgment of value this book fills a substantial gap in the literature of ethical philosophy Tackling difficult issues in an accessible manner it will interest philosophers and students of ethics epistemology and social theory *On Being Someone* Helen Oppenheimer,2016-08-01 This book continues the discussions in *What a Piece of Work on being human* Imprint Academic 2006 and may be considered its sequel Among all the creatures in the physical universe humans seem to be more than simply physical because they are aware of being creatures in the universe Human beings essentially belong to the world of nature yet stand out as the most complex and fascinating of all living beings Like and also unlike other animals they respond to what happens to them they make plans and carry them out they recognize one another sometimes lovingly they make friends and enjoy their company they shape the world around them for convenience and for delight they ask questions both practical and theoretical and many of them try to praise God In *What a Piece of Work* Helen Oppenheimer considered humankind as part of the natural universe which Christians believe God set in motion asking how human beings stand among other creatures and how they are to be valued In this volume she leaves aside comparisons with our fellow creatures in order to attend to our own experience It makes a good start to think of oneself as a human animal but then we need to go further and ask what does it mean to be a person to be counted as someone *Conceiving People* Daniel Groll,2021-08-24 Each year tens of thousands of children are conceived with donated gametes sperm or eggs Some know the identity of their donors Others never will Questions about what donor conceived people should know about their genetic progenitors are significant for literally millions of people including donor conceived people their parents and donors But the

practice of gamete donation also provides a vivid occasion for thinking about questions that matter to everyone What is the value of knowing who your genetic progenitors are How are our identities bound up with knowing where we come from In *Conceiving People Identity Genetics and Gamete Donation* Daniel Groll argues that people who plan to create a child with donated gametes should choose a donor whose identity will be made available to the resulting child This is not Groll argues because having genetic knowledge is fundamentally important Rather it is because donor conceived people are likely to really care about having genetic knowledge and parents should care about what their kids care about *Contemporary Moral and Social Issues*, 2014-04-15 *Contemporary Moral and Social Issues* is a uniquely entertaining introduction that brings ethical thought to life It makes innovative use of engaging topically oriented original short fiction together with classic and influential readings and editorial discussion as a means of helping students think philosophically about ethical theory and practical ethical problems Introduces students to ethical theory and a range of practical moral issues through a combination of key primary texts clear editorial commentary and engaging original fiction Includes discussion of topics such as world poverty abortion animals the environment and genetic engineering containing Facts and Factual Issues for each topic to give students an up to date understanding of related factual issues Uses immersive original short works of fiction as a means to engage students to think philosophically about serious ethical issues Sample Course Framework available [An Outline of the Dialectic of Capital](#) T. Sekine, 1997-09-30 A work of fundamental importance The most extensive and sophisticated reconstruction of Marx's *Capital* ever written takes the work of the Unoist school to new heights Robert Albritton Associate Professor of Political Science York University Toronto Sekine follows the method advanced by Kozu Uno to provide an updated version of Marx's economic theory in its full scope as described in the three volumes of *Das Kapital* It constitutes a dialectical system consisting of the doctrines of Circulation Production and Distribution The whole system defines the idea of capitalism More than a hundred years after Marx's death his economic work is revived here with the analytical rigour expected of modern scientific theory yet with no concession in substance to bourgeois economics [A Primer in Positive Psychology](#) Christopher Peterson, 2006-07-27 Positive psychology is the scientific study of what goes right in life from birth to death and at all stops in between It is a newly christened approach within psychology that takes seriously the examination of that which makes life most worth living Everyone's life has peaks and valleys and positive psychology does not deny the valleys Its signature premise is more nuanced but nonetheless important what is good about life is as genuine as what is bad and therefore deserves equal attention from psychologists Positive psychology as an explicit perspective has existed only since 1998 but enough relevant theory and research now exist to fill a textbook suitable for a semester long college course *A Primer in Positive Psychology* is thoroughly grounded in scientific research and covers major topics of concern to the field positive experiences such as pleasure and flow positive traits such as character strengths values and talents and the social institutions that enable these subjects as well as what recent research might contribute to this knowledge Every chapter

contains exercises that illustrate positive psychology a glossary suggestions of articles and books for further reading and lists of films websites and popular songs that embody chapter themes A comprehensive overview of positive psychology by one of the acknowledged leaders in the field this textbook provides students with a thorough introduction to an important area of psychology

**Action, Embodied Mind, and Life World** Ralph D. Ellis, 2023-10-01 Action Embodied Mind and Life World combines embodied consciousness research existential phenomenology Gendlin's focusing concept and recent self-organizational work on basic emotions e.g. Panksepp Frijda to explore the way patterns of motivated action shape our interpretations of reality personally biologically and within a sociopolitical community Like a bat projecting sonar we understand our world by sensing patterns of resistance against our own self-initiated actions If hammering is the action we find nails and non-nails Actions in turn express a self-organizing process rooted in motivational structures that presuppose values These patterns of motivation therefore prefigure the shape of what we think or perceive But the emotions/feelings/sensings through which we discern motivation are never just about what they seem especially given ample incentives to distortion and self-deception The trigger is the tip of an iceberg This book works toward a coherent method for getting at the basement level of the action trajectories that motivate exploration selective attention and thus interpretations of reality a crucial question in an age of motivated disinformation

**Well-Being** Neera K. Badhwar, 2014-06-02 This book offers a new argument for the ancient claim that well-being as the highest prudential good eudaimonia consists of happiness in a virtuous life The argument takes into account recent work on happiness well-being and virtue and defends a neo-Aristotelian conception of virtue as an integrated intellectual/emotional disposition that is limited in both scope and stability This conception of virtue is argued to be widely held and compatible with social and cognitive psychology The main argument of the book is as follows i the concept of well-being as the highest prudential good is internally coherent and widely held ii well-being thus conceived requires an objectively worthwhile life iii in turn such a life requires autonomy and reality orientation i.e. a disposition to think for oneself seek truth or understanding about important aspects of one's own life and human life in general and act on this understanding when circumstances permit iv to the extent that someone is successful in

achieving understanding and acting on it she is realistic and to the extent that she is realistic she is virtuous v hence well being as the highest prudential good requires virtue But complete virtue is impossible for both psychological and epistemic reasons and this is one reason why complete well being is impossible      **Objective English, 4/e** Edgar Thorpe, Showick Thorpe, 2011 The fourth edition of Objective English is a comprehensive test preparation tool that helps the learner to methodically improve their skills for various competitive examinations This book assists students in recognizing their weaknesses and enables them to eliminate them Objective English also highlights learner s strengths in the process This book activates stimulates and accelerates the learning process while familiarizing the reader with current trends in questions This carefully structured and easy to read course explains the basic rules of English and prepares students for examinations with the help of near original test papers of recent examinations conducted by various bodies such as the UPSC SSC Banking Services Railways Recruitment Boards private corporate organizations and central and state recruitment bodies It is also an indispensable aid for preparing for the CDS NDA MBA MCA BCA hotel management law and NIFT NID entrance examinations      **The Ethics of Capitalism** Daniel Halliday, John Thrasher, 2020-05-13 Can capitalism have moral foundations Though this question may seem strange in today s world of vast economic disparities and widespread poverty discussions originating with the birth of capitalism add a critical perspective to the current debate on the efficacy and morality of capitalist economies Authors Daniel Halliday and John Thrasher use this question to introduce classical political philosophy as a framework by which to evaluate the ethics of capitalism today They revisit and reconstruct historical eighteenth and nineteenth century defenses of capitalism as written by key proponents such as Adam Smith and John Stuart Mill They ask what these early advocates of market order would say about contemporary economies and argue for the importance of connecting these foundational defenses to discussions of economic systems and the roles they play in economic justice and injustice today The textbook covers longstanding problems that are as old as the discussion of capitalism itself such as wage inequality global trade and the connection between paid labor and human flourishing It also addresses new challenges such as climate change the welfare state and competitive consumption and provides topical global case studies Additionally it includes study questions at the end of each chapter and an author created companion website to help guide classroom discussion      *The Engineering Leader* Cate Huston, 2024-04-16 Great engineers don t necessarily make great leaders at least not without a lot of work Finding your path to becoming a strong leader is often fraught with challenges It s not easy to figure out how to be successful empathetic and caring yet tough Whether you re on the management or individual contributor track you need to develop strong leadership skills This book guides you on the path to becoming a well rounded and resilient engineering leader The first half focuses on you and how you can develop the self management skills needed to survive and thrive in a leadership role The second half focuses on teams including the necessary components of team functioning that will empower and support your teams and the individuals within them You ll learn how to create and balance

both individual and team growth      *Collected Papers, Volume 2* Stephen Stich, 2012-07-16 This volume collects the best and most influential essays on knowledge rationality and morality that Stephen Stich has published in the last 40 years All of the essays are concerned in one way or another with the ways in which findings and theories in the cognitive sciences can contribute to and sometimes reshape traditional philosophical conversations and debates A central theme in the essays on epistemology and rationality is the philosophical significance of empirical work on human reasoning done by researchers in the heuristics and biases tradition and by their critics in evolutionary psychology In the essays on morality a wide range of empirical work is explored including studies of the psychological foundations of norms work on the moral conventional distinction and empirical attempts to determine whether humans ever act on altruistic motives Stich was one of the pioneers in the experimental philosophy movement and work in experimental philosophy plays a prominent role in many of these essays The volume includes a new introductory essay that offers an overview of the papers and traces the history of how they emerged

Transcending Modernity with Relational Thinking Pierpaolo Donati, 2021-03-30 The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003146698> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license This book explores the ways in which social relations are profoundly changing modern society arguing that constituting a reality of their own social relations will ultimately lead to a new form of society an aftermodern or relational society Drawing on the thought of Simmel it extends the idea that society consists essentially of social relations in order to make sense of the operation of dichotomous forces in society and to examine the emergence of a third in the morphogenetic processes Through a realist and critical relational sociology which allows for the fact that human beings are both internal and external to social relations and therefore to society the author shows how we are moving towards a new trans modern society one that calls into question the guiding ideas of Western modernity such as the notion of linear progression that science and technology are the decisive factors of human development and that culture

can entirely supplant nature As such it will appeal to sociologists social theorists economists political scientists and social philosophers with interests in relational thought critical realism and social transformation      *Oswaal CAT 25 Years Solved Papers + 15 Mock Test Papers (Set of 2 books) For 2024 Exam* Oswaal Editorial Board,2024-01-03 Description of product 100% Updated With 2023 Paper Shift 1 3 Fully Solved Extensive Practice With 2200 Chapter wise Practice Questions and 15 Mock Test Papers with Detailed Explanations 100% Exam Readiness With Previous Years Subjective Trend Analysis Crisp Recap With Mind Maps Mnemonics Valuable Exam Insights With Tips Tricks Shortcuts to ace CAT in 1st attempt      **Oswaal CAT 25 YEARS Chapter-wise & Topic-wise Solved Papers (VARC, DILR & QA) (1991-2008 & 2017-2023) for 2024 Exam** Oswaal Editorial Board,2023-12-28 Description of the product 100% Updated with 2023 Three Shifts Papers Fully Solved Concept Clarity learn key concepts through Revision Notes and smart Shortcuts Extensive Practice with 2200 Chapter wise Practice Questions 3 Sample Question Papers Crisp Recap with Smart Mind Maps Mnemonics Concept Videos Valuable Exam Insights with Tips Tricks Shortcuts to ace CAT in 1 st attempt 100% Exam Readiness with Previous Years Subjective Trend Analysis      Oswaal CAT Common Admission Test 5 Years' Yearwise Solved Papers Shiftwise 2018-2022 VARC, DILR & QA (For 2023 Exam) Oswaal Editorial Board,2023-04-22 Description of the product 100% Updated with 2022 Papers Shift to 3 Fully Solved Extensive Practice with 1000 Questions 1 Sample Paper Crisp Revision with smart Mind Maps Mnemonics Valuable Exam Insights with Hints Shortcuts Expert Tips to crack CAT on the first attempt Concept Clarity with 1000 Concepts 100% Exam Readiness with 5 Years Section wise Trend Analysis 2018 2022      Team Maxwell 2in1 (Winning With People/17 Indisputable Laws) John C.
