Something In The Soil Field Testing The New Western History:

Something in the Soil Patricia Nelson Limerick, 2001 Patricia Limerick is simply one of the best writers alive Garry Wills Borderland Narratives Andrew K. Frank, A. Glenn Crothers, 2019-04-16 Broadening the idea of borderlands beyond its traditional geographic meaning this volume features new ways of characterizing the political cultural religious and racial fluidity of early America It extends the concept to regions not typically seen as borderlands and demonstrates how the term has been used in recent years to describe unstable spaces where people cultures and viewpoints collide The essays include an exploration of the diplomacy and motives that led colonial and Native leaders in the Ohio Valley including those from the Shawnee and Cherokee to cooperate and form coalitions a contextualized look at the relationship between African Americans and Seminole Indians on the Florida borderlands and an assessment of the role that animal husbandry played in the economies of southeastern Indians An essay on the experiences of those who disappeared in the early colonial southwest highlights the magnitude of destruction on these emergent borderlands and features a fresh perspective on Cabeza de Vaca Yet another essay examines the experiences of French missionary priests in the trans Appalachian West adding a new layer of understanding to places ordinarily associated with the evangelical Protestant revivals of the Second Great Awakening Collectively these essays focus on marginalized peoples and reveal how their experiences and decisions lie at the center of the history of borderlands They also look at the process of cultural mixing and the crossing of religious and racial boundaries A timely assessment of the dynamic field of borderland studies Borderland Narratives argues that the interpretive model of borders is essential to understanding the history of colonial North America A volume in the series Contested Boundaries edited by Gene Allen Smith Contributors Andrew Frank A Glenn Crothers Rob Harper Tyler Boulware Carla Gerona Rebekah M K Mergenthal Michael Pasquier Philip Mulder Julie Winch Myth and Environment in Recent Southwestern Literature , Theda Wrede, 2014-04-10 The romantic perception of the American Southwest as a wild and dangerous frontier where heroic settlers prove their endurance has often responded to a common human desire to escape from the pressures of civilization and experience an authentic relationship with nature This idealized notion about life in the Southwest however has contributed the subjugation of the indigenous populations and the natural world while helping rationalize the conquest of both In Myth and Environment in Recent Southwestern Literature Theda Wrede brings contemporary Southwestern American literature under the microscope to examine the ways in which the mythic narrative has influenced attitudes toward the land in the region Focusing on popular novels by Cormac McCarthy Barbara Kingsolver Leslie Marmon Silko and Denise Ch vez Wrede explores the psychology behind the myth and discusses the ways in which the four authors deploy the mythic narrative interrogate its validity and offer visions for alternative modes of inhabiting the Southwest In combining ideas from a culturally sensitive ecofeminist theory psychoanalysis postcolonial studies and literary studies the study offers an innovative conceptual framework for discussions about environmental responsibility in the twenty first century Finally it also

encourages its readers to partake in the process of mythogenesis by imagining sustainable narratives to help rescue the promise of the Southwest for the new millennium *Stalinism on the Frontier of Empire* Elena Shulman,2008-10-16 A fascinating history of frontier Stalinism that sheds new light on the nature of Soviet society and Stalinism in the 1930s

Strangers on Familiar Soil Edward Dallam Melillo,2015-10-20 This groundbreaking history explores the many unrecognized enduring linkages between the state of California and the country of Chile The book begins in 1786 when a French expedition brought the potato from Chile to California and it concludes with Chilean president Michelle Bachelet s diplomatic visit to the Golden State in 2008 During the intervening centuries new crops foods fertilizers mining technologies laborers and ideas from Chile radically altered California s development In turn Californian systems of servitude exotic species educational programs and capitalist development strategies dramatically shaped Chilean history Edward Dallam Melillo develops a new set of historical perspectives tracing eastward moving trends in U S history uncovering South American influences on North America s development and reframing the Western Hemisphere from a Pacific vantage point His innovative approach yields transnational insights and recovers long forgotten connections between the peoples and ecosystems of Chile and California **The Founders and Finance** Thomas K. McCraw,2012-10-08 In 1776 the U S owed

huge sums to foreign creditors and its own citizens but lacking the power to tax had no means to repay them This is the first book to tell the story of how foreign born financial specialists the immigrant founders Hamilton and Gallatin solved the fiscal crisis and set the nation on a path to long term economic prosperity Class and Race in the Frontier Army Kevin Adams,2012-11-19 Historians have long assumed that ethnic and racial divisions in post Civil War America were reflected in the U S Army of whose enlistees 40 percent were foreign born Now Kevin Adams shows that the frontier army was characterized by a Victorian class divide that overshadowed ethnic prejudices Class and Race in the Frontier Army marks the first application of recent research on class race and ethnicity to the social and cultural history of military life on the western frontier Adams draws on a wealth of military records and soldiers diaries and letters to reconstruct everyday army life from work and leisure to consumption intellectual pursuits and political activity and shows that an inflexible class barrier stood between officers and enlisted men As Adams relates officers lived in relative opulence while enlistees suffered poverty neglect and abuse Although racism was ingrained in official policy and informal behavior no similar prejudice colored the experience of soldiers who were immigrants Officers and enlisted men paid much less attention to ethnic differences than to social class officers flaunting and protecting their status enlisted men seething with class resentment Treating the army as a laboratory to better understand American society in the Gilded Age Adams suggests that military attitudes mirrored civilian life in that era with enlisted men especially illustrating the emerging class consciousness among the working poor Class and Race in the Frontier Army offers fresh insight into the interplay of class race and ethnicity in late nineteenth century America

Mining, the Environment, and Indigenous Development Conflicts Saleem H. Ali,2021-10-19 From sun baked Black Mesa to the icy coast of Labrador native lands for decades have endured mining ventures that have only lately been subject to environmental

laws and a recognition of treaty rights Yet conflicts surrounding mining development and indigenous peoples continue to challenge policy makers This book gets to the heart of resource conflicts and environmental impact assessment by asking why indigenous communities support environmental causes in some cases of mining development but not in others Saleem Ali examines environmental conflicts between mining companies and indigenous communities and with rare objectivity offers a comparative study of the factors leading to those conflicts Mining the Environment and Indigenous Development Conflicts presents four cases from the United States and Canada the Navajos and Hopis with Peabody Coal in Arizona the Chippewas with the Crandon Mine proposal in Wisconsin the Chipewyan Inuits D n and Cree with Cameco in Saskatchewan and the Innu and Inuits with Inco in Labrador These cases exemplify different historical relationships with government and industry and provide an instance of high and low levels of Native resistance in each country Through these cases Ali analyzes why and under what circumstances tribes agree to negotiated mining agreements on their lands and why some negotiations are successful and others not Ali challenges conventional theories of conflict based on economic or environmental cost benefit analysis which do not fully capture the dynamics of resistance He proposes that the underlying issue has less to do with environmental concerns than with sovereignty which often complicates relationships between tribes and environmental organizations Activist groups he observes fail to understand such tribal concerns and often have problems working with tribes on issues where they may presume a common environmental interest This book goes beyond popular perceptions of environmentalism to provide a detailed picture of how and when the concerns of industry society and tribal governments may converge and when they conflict As demands for domestic energy exploration increase it offers clear guidance for such endeavors when native lands are involved
