

Sometimes it's necessary to go a long
distance out of the way in order to
come back a short distance correctly.

Lawrence, 2023-10-20 Using a critical lens derived from ecopsychology and its praxis ecotherapy this book explores the relationships Madeleine L Engle develops for her characters

in a selection of the novels from her three Time Austin family and O Keefe family series as those relationships develop along a human nonhuman kinship continuum This is accomplished through an examination both of pairs of novels from the fantastic and the realistic series and of single novels which stand out as slightly different from the most prominent genre in a given series Thus this examination also shows L Engle s fluid movement along a fantasy reality continuum and demonstrates the integration of the three series with each other Importantly through examining these relationships and this movement along continuums in these novels the project demonstrates how ecopsychology and ecotherapy provide strong and important and as yet virtually unexplored intersections with children s literature

Multimedia Computing Gerald Friedland,Ramesh Jain,2014-07-28 Humans are the best functioning example of multimedia communication and computing that is we understand information and experiences through the unified perspective offered by our five senses This innovative textbook presents emerging techniques in multimedia computing from an experiential perspective in which each medium audio images text and so on is a strong component of the complete integrated exchange of information or experience The authors goal is to present current techniques in computing and communication that will lead to the development of a unified and holistic approach to computing using heterogeneous data sources Gerald Friedland and Ramesh Jain introduce the fundamentals of multimedia computing describing the properties of perceptually encoded information presenting common algorithms and concepts for handling it and outlining the typical requirements for emerging applications that use multifarious information sources Designed for advanced undergraduate and beginning graduate courses the book will also serve as an introduction for engineers and researchers interested in understanding the elements of multimedia and their role in building specific applications
