Gottfried, 1995 Environmentalists have turned to Eastern religion Deep Ecology and Native American religion for alternatives to the Western view that humans should dominate nature In Economics Ecology and the Roots of Western Faith Robert R Gottfried persuasively demonstrates that the ancient Hebrew worldview found in the Torah and the New Testament is remarkably green Drawing on these insights from ancient Western thought and economic understanding of ecosystems and natural processes Gottfried analyzes the prerequisites for maintaining or improving human welfare and ecological vitality in terms of land economics and management

Tim Wallace, 1997-01-01 *Cry of the Earth, Cry of the Poor* Leonardo Boff, 1997 Focusing on the threatened Amazon of his native Brazil Boff traces the economic and metaphysical ties that bind the fate of the rain forests with the fate of the indigenous peoples and the poor of the land He shows how liberation theology must join with ecology in reclaiming the dignity of the earth and our sense of a common community part of God's creation To illustrate the possibilities Boff turns to resources in Christian spirituality both ancient and modern from the vision of St Francis of Assisi to cosmic christology

Religion in Rebellions, Revolutions, and Social Movements Warren S. Goldstein, Jean-Pierre Reed, 2022-05-19 Religion in Rebellions Revolutions and Social Movements demonstrates that while religion is often a social force that maintains if not legitimates the sociopolitical order it is also a decisive factor in economic social and political conflict The book explores how and under what conditions religion functions as a progressive and or reactionary force that compels people to challenge or protect social orders The authors focus on the role that religion has played in peasant slave and plebeian rebellions revolutions including the Chinese English French Russian and Iranian and modern social movements In addition to these case studies the book also contains theoretical chapters that explore the relationship religious thought has with the politics of liberation and oppression It examines the institutional organizational ritualistic discursive ideological and or framing mechanisms that give religion its oppressive and liberating structures Many scholars of religion continue very conventional modes of thinking ignoring how religion has been and continues to be both a hegemonic and counterhegemonic force in conflict This book looks at both sides

of the equation This international and interdisciplinary volume will be of interest to students and scholars in the fields of politics of religion sociology of religion religious studies gender studies and history Creation and Salvation: A companion on recent theological movements E. M. Conradie, 2012 Christians trying to save the planet have to relate creation with salvation This volume explores the ways in which this task is approached by a wide range of recent theological movements

Trees, People and Power Peter Utting, 2013-11-05 Behind the headlines about the loss of tropical forests in Latin America lies a complex and fascinating story of the social pressures which cause it Trees People and Power looks at the various groups interests and conflicts involved and explores the repercussions for forestry the environment and the livelihoods of the rural and urban poor Until the social and political dimensions of deforestation and forest protection schemes are understood measures to prevent or slow deforestation are likely to involve technical interventions which will prove ineffective in the long run and may well result in further impoverishment and environmental degradation Peter Utting takes a critical look at the experience of forest protection and tree planting in a number of countries and considers how social and political factors affect the feasibility of such schemes Many environmental projects and programmes have failed to balance concerns for the environment with those of human welfare Until they do it is unrealistic to expect any significant progress towards sustainable development Peter Utting is a senior researcher coordinator with the United Nations Research Institute for Social Development He is the author of Economic Adjustment under the Sandinistas UNRISD 1991 and Economic Reform and Third World Socialism Macmillan 1992 Originally published in 1993 Deforestation, Colonization and Utilization of Land Resources in the Atlantic Zone of Costa Rica, *Handbook of Latin American Studies* Dolores Moyano Martin, P. involved in redemption rather a mere stage for the human salvific drama After critically and constructively summarizing previous initiatives toward an ecological theology Bergmann opens up an extraordinary dialogue between these initiatives and church father Gregory of Nazianzus Through the neglected topics of sociality motion suffering and the Spirit the author brings to light Gregory's thought on the liberation of creation Finally Bergmann connects ecological issues and patristic tradition with contemporary liberation theology *Nuevos paradigmas para la educación* María Eugenia Dengo, 2002
