

# SONET/SDH is being phased out

SONET technology is widely deployed, but

- SONET technology is aging
- SONET equipment is becoming obsolete and hard to find
- SONET is hard to maintain (parts hard to obtain and expensive)
- finding staff with SONET expertise is becoming ever more difficult
- no new rates/functionality/standards/applications are being developed for SONET

Modern packet-based networks (based on Ethernet, MPLS, and IP)

- are the present and future
- are broadband and becoming even more so
- are less expensive (both CAPEX and OPEX) and more flexible
- are being actively extended (e.g., migration to 61850)

But there are open questions

- can all the relevant services be migrated to packet (e.g., teleprotection, synchrophasors)?
- which packet-based network to choose?
