The Apache Longbow Helicopter:

AH-64D Apache Longbow John Hamilton, 2012-01-01 This title explores the development and use of the versatile AH 64D Apache Longbow attack helicopter. Readers will follow the history of its origins from the AH 56 Cheyenne to the AH 64. Chapters detail the aircraft's military and performance specifications as well as its features and advantages in the field such as its Northrop Grumman millimeter wave Longbow radar, its two turboshaft engines, and its powerful guns and missiles. Readers will also learn about the Apache Longbow's use in Panama, Operation Desert Storm, Operation Anaconda, and other significant combat and peacekeeping missions. Aligned to Common Core Standards and correlated to state standards. A D Xtreme is an imprint of Abdo Publishing, a division of ABDO. *The AH-64 Apache Helicopter* Ole Steen Hansen, 2005-07 Provides an in-depth look at the AH 64 Apache helicopter with detailed cross-section diagrams, photographs, and additional facts and information. *Success Stories*, 2001 **Apache Helicopter Pilots** Antony Loveless, 2009-08 These army pilots fly the most demanding helicopter in existence. Only 3% of existing army helicopter pilots qualify to fly it. Trainees have to learn to train their eyes to work independently of each other while the right eye sees flight and weapons information in the helmet's monocular; the left eye is free to look outside the aircraft and scan for threats and other obstacles. This book lifts the lid on what life is like for these men and women: their training, the aircraft, the missions, and what it's actually like to be under fire while trying to protect soldiers on the ground. *Apache Helicopter* Matthew Pitt, 2000 A series about the most sophisticated and up-to-date military weaponry explained in vivid detail. Highlighting the profiles and uses of these weapons, reluctant teen readers will learn much about military technology. **Success Stories**, 2001* *Longbow Apache Helicopter: Key Factors Used to Measure Progress in Development Need to be Changed*, 1991 The Army plans to spend about \$4 billion to modify 227 AH 64 Apache helicopters into Longbow Apache helicopters. The modification program includes the addition of a new radar technology designed to increase the Apache's ability to destroy tanks and other enemy assets. Concerned about the Apache's reliability and logistical support problems and the Army's ability to develop technologically advanced weapon systems, the Chairman of the Legislation and National Security Subcommittee, House Committee on Government Operations, asked GAO to evaluate the Army's acquisition plan for the Longbow Apache to determine whether 1 the plan is designed to identify and correct potential problems before entering full-rate production and 2 the requirements used to evaluate the Longbow Apache will effectively measure its key performance capabilities. *Apache Longbow Helicopter* United States. General Accounting Office, United States. Department of Defense, 1997 *The World's Fastest Helicopters* Glen Bledsoe, Karen Bledsoe, Karen E. Bledsoe, 2002 Discusses the history and development of some of the world's fastest helicopters, describing the specific features and specifications of such aircraft as the SA 360 Dauphin, Boeing Sikorsky RAH 66 Comanche, AH 64 Apache, and V 22 Osprey. *Apache Longbow Helicopter: Fire Control Radar Not Ready for Multiyear Procurement*, 1997 The Longbow is a modification of the Apache helicopter that

consists of an upgraded airframe a newly developed radar and the Longbow Hellfire missile The Apache Longbow is designed to conduct precision attacks in adverse weather conditions automatically engage multiple targets provide fire and forget missile capability and operate on the digital battlefield of the future The radar the key component of the Longbow is designed to provide the helicopter with the capability to automatically detect classify and prioritize targets In 1991 the Army planned to develop and procure 227 Longbow Apache helicopters In May 1993 the program was restructured to upgrade the entire fleet of 758 helicopters to the Apache Longbow configuration but outfit only 227 with the fire control radar and a more powerful 701C engine Full rate production of both the Apache Longbow airframe and fire control radar was authorized in October 1995 The first contract for 10 fire control radars was awarded in March 1993 and the second contract was finalized in January 1997 for an additional 11 radars The Army plans to award a multiyear contract for the fire control radar in December 1997

Apache Helicopter United States. General Accounting Office,1990 Longbow Apache Helicopter: System Procurement Issues Need to be Resolved ,1995 This report presents the results of our review of the Department of the Army s Longbow Apache weapon system Because this program is scheduled to enter production later this year we focused specifically on whether 1 critical issues related to the production of the aircraft and the producibility of its missiles had been addressed and 2 the Longbow Hellfire missile procurement plan was adequately developed We also reviewed the need for full consideration of all cost effective alternatives to the production of this attack helicopter system We believe that the information in this report will be useful as you review the Department of Defense s DOD plans for this program The Army plans to upgrade its AH 64A Apache attack helicopter already considered by the Army to be the most advanced attack helicopter in the world into a new version known as the AH 64D Longbow Apache All 758 helicopters in the Apache fleet will be modernized with new avionics and be capable of firing both the laser guided Hellfire missile and a radar aided Longbow Hellfire fire and forget missile that is under development These improvements are designed to among other things allow the Apache to conduct precision attacks in adverse weather automatically engage multiple targets and operate on the digital battlefield of the future Additionally 227 of the 758 upgraded Apaches will be equipped with a new mast mounted millimeter wave fire control radar and more powerful engines KAR P 2 3
