California Archaeology Michael J. Moratto, 2014-05-10 California Archaeology provides a compilation of knowledge for archeologists who are not California specialists This book explains important cultural events and patterns discovered archeologically Organized into 11 chapters this book begins with an overview of California s historic and ancient environments as well as the evidence of Pleistocene human activity This text then examines the glacial and other environmental conditions that would have influenced the origins adaptations and spread of the earliest North Americans Other chapters consider how California s past is relevant to a wider understanding of human behavior This book discusses as well the perceptions of Central Coast and San Francisco Bay region prehistory that have changed rapidly as a result of intensive fieldwork performed to comply with environmental law The final chapter deals with the data of historical linguistics which indicate something of the cultural relationships and events that might have occurred in the past This book is a valuable resource for archeologists California's Ancient Past Jeanne E. Arnold, Michael R. Walsh, 2010-05-01 California s Ancient Past is an excellent introduction and overview of the archaeology and ancient peoples of this diverse and dynamic part of North America Written in a concise and approachable format the book provides an excellent foundation for students the general public and scholars working in other regions around the world This book will be an important source of information on California s ancient past for years to come Torben C Rick Smithsonian Institution **A Bibliography of the Archaeology of California** University of California Archaeological Survey, 1949 **Foragers on America's Western Edge** Terry L. Jones, Brian F. Coddling, 2018-09-30 The California coastline has long been of interest to archaeologists This book directs attention to the largely ignored Pecho Coast a rugged isolated 20km long peninsula between modern day Morro Bay and Pismo Beach Archaeological work along this stretch was last synthesized in 1972 Jones and Coddling now bring together the extensive contract work and field school studies of the intervening years shedding new light on the region s early inhabitants The first people of the Pecho Coast were part time residents who exploited shellfish fish and marine birds including the flightless duck *Chendytes lawi* which sustained hunting drove to extinction ca 2800 cal BP This marked the only unequivocal case of prehistoric human caused extinction in western North America Cold productive seas allowed inhabitants to weather droughts of the Medieval Climatic Anomaly 950n600 cal BP after which shell beads became increasingly abundant representing either the initial appearance of Chumash speaking peoples or attempts by Chumash leaders to consolidate power through gifting reciprocal exchange or forced conquest During the mission era fishing sustained the Native community as for the first time individuals became fully sedentary foraging within a limited radius to avoid contact with the Spanish This record reveals a unique story of local adaptation anthropogenic habitat change social differentiation and ultimately resistance to colonial invasion Provided by publisher A Bibliography
