## The Architect And The City:

**The Architecture of the City** Aldo Rossi, 1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century The Architecture of the City is his major work of architectural and urban theory In part a protest against functionalism and the Modern Movement in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study and in part an analysis of the rules and forms of the city s construction the book has become immensely popular among architects and design students      **The Architect and the City** José Luis Sert, 1957      **What Goes Up** Michael Sorkin, 2018-05-01 A radical architect examines the changing fortunes of the contemporary city Michael Sorkin is one of the most forthright and engaging architectural writers in the world In What Goes Up he takes to task the public officials developers civic organizations and other heroes of big money who have made of Sorkin s beloved New York a city of glittering towers and increasing inequality He unpacks not simply the forms and practices from zoning and political deals to the finer points of architectural design that shape cities today but also offers spirited advocacy for another kind of city reimagined from the street up on a human scale a home to sustainable just and fulfilling neighborhoods and public spaces Informing his writing is a lifetime s experience as an architect and urbanist Sorkin writes of the joys and techniques of observing and inhabiting cities and buildings in order to both better understand and to more happily be in them Sorkin has never been shy about naming names He has been a scourge of design mediocrity and of the supine compliance of starchitects who readily accede to the demands of greed and privilege What Goes Up casts the net wide as he directs his arguments to students professionals and urban citizens with vigor expertise respect and barbed wit      1972, [unclear] [unclear] [unclear]

**Young Architects: City Limits** Princeton Architectural Press, 2002-09 City Limits presents the work of the best of a new generation of architects as selected by the jury of the Architectural League's annual Young Architects competition. This year's winners were asked: In what ways do current modes of architectural production address cities as artifacts and cities as visions? The responses are varied and accomplished, from Petra Kempf's hand-drawn series of diagrams of urban movement, transportation, and form to Teddy Cruz's ongoing involvement in the development of the US-Latin American border through SERVO's series of product lines, Thaddeus Briner's design for a football stadium, Manifold's RANT project, a design for Manhattan's east side, and nARCHITECTS's Hotel Pro Forma. Together, these exciting new designers explore the possibilities for urban development in adroit texts and dazzling graphics.
