## **The Art Of Internet Cruising:**

The Art of Internet Cruising Greg Wilson, 2000-09-01 Meeting anyone is hard but by using the Internet that process is made a lot easier Gregory proves that you don't have to be an intellectual or have extreme computer knowledge to learn how to meet people on the Internet You do have to take the first step and get a computer If you already have a computer then this book will help you to tap into the power of the Internet The Internet is such an amazing place to meet people A lot of people don't even realize that you can do practically everything from your computer by surfing the Internet I've been working on the computer since I was in High School Since I've been cruising the Internet for a while people always ask me how I could pick up a lot of people Most guys that I talk to seem to have bad luck at meeting people on the Internet Problems with how to get started where to go and countless other issues lead quickly to frustration I've solved these problems and made it easy for anyone to understand When I decided to write my book to help a lot of my friends I wanted to write the book so that anyone could use the power of the Internet I've achieved this goal by documenting many of the features of the Internet that anyone can use to their own advantage I've made some really good friends by using the Internet that I would never even have met under other circumstances So why not let everyone enjoy the power of cruising the Internet That's where my book comes into play Instead of answering countless questions about computers and the Internet I can tell my friends about my comprehensive book that explains the culture of the Internet By learning from my years of experience on the computer people will be able to read my book and learn how to cruise the Internet There are many techniques for cruising the Internet that most people don't even know about Working in the computer industry keeps me up to date on the latest technology As I was writing the book a lot of considerations came into my mind The right computer Internet access and countless other issues to work out I've outlined some really inexpensive ways to get access to the Internet Not only will you be able to get free Internet access but you can also learn how to talk on the Internet and save yourself a huge long distance phone bill All of the knowledge I have gotten about the Internet has been from gathering information from years of experience All of that knowledge will be shared with you in my book The Art Of Internet Cruising talks about meeting people by using a computer Its hard to meet partners in the real world By looking at my experiences you can see later how much the Internet has helped me develop a style of cruising that I like to refer to as Cyber Cruising I've shared so much knowledge with friends and people from work that I feel that everyone should know what the Internet can do for them Image having the power to go to 10 bars all at once You're chances for meeting someone would be greatly improved Well in the real world we can't be at more than one place at a time But on the Internet you can visit any number of chats at the same time So you'll get the feel of really using your computer power Speaking of computer power the book will also lead you through the process of deciding what type of computer to buy When you buy a computer you will need to determine the amount of memory hard drive space hardware software modem and a lot of other things to go along with the computer We'll take a look at all of the requirements

that your personal computer should have for getting the most out of your Internet experience Once you have a computer the next step is to get an Internet Service Provider Internet Service Providers **PAVNET Online User's Guide** ,1995
