The Dobsonian Telescope A Practical Manual For Building Large Aperture Telescopes:

The Dobsonian Telescope David Kriege,1997 **Choosing and Using a Dobsonian Telescope** Neil

English,2011-07-25 In the 1960 s American amateur astronomer John Dobson designed a revolutionary kind of astronomical telescope featuring a lightweight large aperture reflecting system on a simple mounting using the then revolutionary material called teflon The design combines simplicity and portability with large aperture prowess Thirty years later Dobsonians remain supreme for visually observing faint deep sky objects and are one of the best selling large telescopes in the USA and Europe This popularity is reflected in the recent increase of companies now heavily marketing Dobsonians in particular Meade the Lightbridge range Orion USA XT Intelliscope series and Skywatcher Skyliner and Flextube models This book is the ultimate guide to buying and using commercial Dobsonians both Econo and Primo models with in depth accounts for the various models plus accessories on the market and descriptions of the many innovations that amateurs have made to optimize their telescopes performance **Amateur Telescope Making** Stephen Tonkin,2012-12-06 Many amateur

astronomers make their own instruments either because of financial considerations or because they are just interested Amateur Telescope Making offers a variety of designs for telescopes mounts and drives which are suitable for the home constructor The designs range from simple to advanced but all are within the range of a moderately well equipped home workshop The book not only tells the reader what he can construct but also what it is sensible to construct given what time is available commercially Thus each chapter begins with reasons for undertaking the project then looks at theoretical consideration before finishing with practical instructions and advice An indication is given as to the skills required for the various projects Appendices list reputable sources of mail order materials and components The telescopes and mounts range from shoestring very cheap instruments to specialist devices that are unavailable commercially Care of Astronomical

Telescopes and Accessories M. Barlow Pepin,2006-03-30 Commercially made astronomical telescopes are better and less expensive than ever before and their optical and mechanical performance can be superb When a good quality telescope fails to perform as well as it might the reason is quite probably that it needs a little care and attention Here is a complete guide for anyone who wants to understand more than just the basics of astronomical telescopes and accessories and how to maintain them in the peak of condition The latest on safely adjusting cleaning and maintaining your equipment is combined with thoroughly updated methods from the old masters Here too are details of choosing new and used optics and accessories along with enhancements you can make to extend their versatility and useful lifetime This book is for you Really Looking after an astronomical telescope isn t only for the experts although there are some things that only an expert should attempt and every serious amateur astronomer will find invaluable information here gleaned from Barlow Pepin s many years experience working with optical instruments **Star Ware** Philip S.
