Sabbath as Resilience Kenneth J. Barnes, C. Sara Lawrence Minard, 2025-03-28 People everywhere are feeling the stress of modern life in ways not seen for generations Emerging from the fog of the first pandemic in one hundred years they face economic uncertainty political acrimony war and the threat of war environmental degradation and technological advances that amaze and frighten in equal measure Time and space condense as unrelenting connectedness blurs the lines between work and play fact and fiction need and desire The devices meant to improve lives dominate them in what theologian Walter Brueggemann calls the tyranny of now People are looking for accessible solutions to complex problems People need resilience but are ill equipped to find it In this book the Fellows of the Mockler Center at Gordon Conwell Theological Seminary offer a solution not from the well trodden psychological disciplines or the lure of New Age mysticism but in a concept as old as the Scriptures themselves the divine gift of Sabbath The authors explore in detail Jesus words Sabbath was made for humanity not humanity for the Sabbath proposing five areas values time space people and faith where a more comprehensive understanding of Sabbath can build resilience by reshaping personal and professional identities in accord with God's will and purpose

The Devil's Revenge Jack Darmend, 2012-02-10 As long as mankind has existed he has been plagued by two questions Where did I come from and Where am I going Anthropologists geologists astronomers and archaeologists have been searching for an answer to the first question and have produced a lot of evidence to show where mankind came from and how long mankind has existed on planet Earth Theology students have applied their own thinking on both these questions and claim to know the answers This book takes an individual view and reaches a

definite and alarming conclusion The author lived with his family through the Second World War and after the end of the war went to an agricultural college and then spent many years as a farm worker where he came to the conclusion that life was not as we have been led to believe by the establishment In the agricultural college he studied the work of Gregor Mendel and the subject of genetics in all living things animal and plants of all kinds and reached the conclusion that the creator of all life on earth is the sun which is responsible through its various light forms infrared ultraviolet and other forms of lights that are not visible to mankind but can be seen by some species of animal that humans look down on and think of as low life
