Utting's 1997 report *People Like Us* adding new dimensions and insights to the current debate. It should be widely read and discussed by policy makers and practitioners concerned with child care and protection. Managing Reproductive Life Soraya Tremayne, 2001. In 1999 the Institute of Social and Cultural Anthropology at the University of Oxford held a workshop on the social dynamics of human reproduction. This volume contains 12 papers from scholars in Britain and the U.S. that were originally presented at that workshop. Topics include, for example, motherhood among young prostitutes in Thailand, the meaning of children in Hong Kong, and the reproductive health of refugees. Annotation copyrighted by Book News Inc. Portland, OR. *Developmental Science and the Holistic Approach* Lars R. Bergman, Robert B. Cairns, Lars-Goran Nilsson, Lars Nystedt, 2000. This volume celebrates David Magnusson's career-long contributions with a collection of chapters by internationally renowned colleagues on the holistic approach that is transforming developmental psychology for developmentalists and lifespan researchers. **Young people, education, and sustainable development** Peter Blaze Corcoran, Philip M. Osano, 2023-09-04. Young people have an enormous stake in the present and future state of Earth. Almost half of the human population is under the age of 25. If young people's resources of energy, time, and knowledge are misdirected towards violence, terrorism, socially isolating technologies, and unsustainable consumption, civilization risks destabilization. Yet there is a powerful opportunity for society if young people can participate positively in all aspects of sustainable development. In order to do so, young people need education, political support, resources, skills, and hope. This volume offers a global perspective on education initiatives by and for young people that promote a transition to sustainability. It includes 38 essays co-authored by 68 contributors from 25 nations representing a diversity of geography, gender, and generation. The development of youth leadership has been a central concern of my professional work. Young people have a lot to offer to sustainable development and should participate in planning for our planet's future. This rich collection of theoretical and practical approaches captures the growing response of young people to this challenge. I am particularly pleased with the attention paid to the role of often underrepresented regions of the world, to the role of women, and to the Earth Charter in the creating of a peaceful and sustainable future. Julia Marton-Lefevre, Director General of IUCN International Union for Conservation of Nature and former Rector of the University for Peace. This book is a rich global tapestry depicting the interlinkages among youth, education, and sustainable development. What is particularly interesting is that it shows how education at all levels can be a powerful engine for promoting sustainability. This work is an important contribution to the United Nations Decade of Education for Sustainable Development. Goolam Mohamedbhai, Secretary General, Association of African Universities, and Past President, International Association of Universities. This important and skillfully prepared book comes at a critical time. A great strength of this volume is that it blends together theoretical and practical insights regarding education for sustainable development by and for young people. It is written from diverse cultural perspectives from all world regions. Readers from many fields, especially young people and their teachers, will find it timely.

Woodman and Wyn have produced a text that offers conceptual clarity and real depth on debates in youth studies The authors skilfully guide us through the main sociological theories on young people and furnish us with sophisticated critiques from which to rethink youth and generation in the contemporary moment

Professor Anoop Nayak Newcastle University The promise of youth studies is not in simply showing that class gender and race continue to influence life chances but to show how they shape young lives today

Dan Woodman and Johanna Wyn argue that understanding new forms of inequality in a context of increasing social change is a central challenge for youth researchers

Youth and Generation sets an agenda for youth studies building on the concepts of social generation and individualisation to suggest a framework for thinking about change and inequality in young lives in the emerging Asian Century *Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 2003* United States. With her theory of Language as Dialogue Edda Weigand has opened up a new and promising perspective in linguistic research and its neighbouring disciplines Her model of competence in performance solved the problem of how to bridge the gap between competence and performance and thus substantially shaped the way in which people look at language today

This book traces Weigand s linguistic career from its beginning to today and comprises a selection of articles which take the reader on a vivid and fascinating journey through the most important stages of her theorizing

The initial stage when a model of communicative competence was developed is followed by a gradual transition period which finally resulted in the theory of the dialogic action game as a mixed game or the Mixed Game Model

The articles cover a wide range of linguistic topics including among others speech act theory lexical semantics
