

The background of the cover is a detailed architectural drawing of the interior of a dome, showing the ribbed structure and the floor. Overlaid on this drawing are several purple-colored annotations and drawings of architectural details. In the upper left, there is a drawing of a complex joint or connection. Below it is a simple bell-shaped element. To the right, there is a drawing of a structural member, possibly a beam or a part of a vault. In the lower left, there is a drawing of a decorative capital or base. These elements are likely examples of the architectural work or theories discussed in the book.

previously unconsidered John Ruskin and the Fabric of Architecture examines the ways in which Ruskin perceives the evolution of architecture through the idea that architecture is surface The creative act in architecture analogous to the divine act of creation was viewed as a form of dressing By adding highly aesthetic features to designs taking inspiration from the veil of women s clothing Ruskin believed that buildings could be transformed into meaningful architecture This volume discusses the importance of Ruskin s surface theory and the myth of feminine architecture and additionally presents a competing theory of textile analogy in architecture based on morality and gender to counter Gottfried Semper s historicist perspective This book would be beneficial to students and academics of architectural history and theory gender studies and visual studies who wish to delve into Ruskin s theories and to further understand his capacity for thinking beyond the historical methods The book will also be of interest to architectural practitioners particularly Ruskin s theory of surface architecture

After Taste Kent Kleinman,2012 AfterTaste Expanded Practices in Interior Design is an edited volume comprising texts interviews and portfolios that collectively document new theories and emerging critical practices in the field of interior design The material is informed by but not limited to the annual AfterTaste symposia hosted by Parsons The New School of Design The book s central argument is that the field of interior design is inadequately served by its historical reliance on taste making and taste makers and more recently from a set of theoretical concerns derived from architecture the volume seeks to set an expanded frame by advancing new voices and perspectives in both the theory and practice of interior design considered as an independent discipline In 2007 the Department of Architecture Interior Design and Lighting at Parsons The New School for Design inaugurated an annual international symposium series dedicated to the critical study of the interior Titled AfterTaste these yearly symposia offer expansive views of interior studies highlight emerging areas of research identify allied practices make public its under explored territory and attract future designers and scholars to the field Now in its fourth year AfterTaste has proven to be one of the very few venues internationally for critically exploring interior design The field of interior design is asymmetrically served by the current literature in the field Too frequently the current writing and making in interiors emphasize the ineffable the biographical and the social elite and promote a curiously unsubstantiated notion of connoisseurship as the principal basis for design Other attempts to construct an intellectual agenda for the study of the interior draw heavily from architectural theory ignoring the discipline s own specific and autonomous history AfterTaste the book is intended to adjust this imbalance by introducing interior design material that is theoretically and historically situated technically grounded demographically inclusive and aesthetically adventurous

World Observation Matthew Mullane, 2025-09-04 World Observation explores the archives and architecture of It Ch ta 1867 1954 the eminent architectural thinker of the Japanese empire who traveled across Asia Europe and North America to create the first world history of architecture in Japanese from a truly global set of encounters In his mission to integrate Japan into existing world histories legitimate Japanese colonial expansion and train observers to see the world in the way that he did It theorized new kinds of observation kansatsu in writing and drawing that strategically blended epistemological values from European science philosophy and anthropology with Japanese Buddhism folklore and naturalism World Observation presents close readings of It s writings sketches and designs to cast new light on a

key figure in the architectural history of Imperial Japan and situate his contributions within the sweep of global architectural history across the late nineteenth and early twentieth centuries *John Ruskin* Andrew Ballantyne, 2015-06-15 John Ruskin 1819-1900 was the most prominent art and architecture critic of his time. Yet his reputation has been overshadowed by his personal life, especially his failed marriage to Effie Gray, which has cast him in the history books as little more than a Victorian prude. In this book, Andrew Ballantyne rescues Ruskin from the dustbin of history's trifles to reveal a deeply attuned thinker, one whose copious writings had tremendous influence on all classes of society, from roadmenders to royalty. Ballantyne examines a crucial aspect of Ruskin's thinking: the notion that art and architecture have moral value. Telling the story of Ruskin's childhood and enduring devotion to his parents, who fostered his career as a writer on art and architecture, he explores the circumstances that led to Ruskin's greatest works, such as *Modern Painters*, *The Seven Lamps of Architecture*, *The Stones of Venice*, and *Unto This Last*. He follows Ruskin through his altruistic ventures with the urban poor, to whom he taught drawing motivated by a profound conviction that art held the key to living a worthwhile life. Ultimately, Ballantyne weaves Ruskin's story into a larger one about Victorian society, a time when the first great industrial cities took shape and when art could finally reach beyond the wealthy elite and touch the lives of everyday people. **Structures and**

Architecture Paulo J. Cruz, 2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persuade Architecture and the Historical Imagination Martin Bressani, 2016-04-15 Hailed as one of the key theoreticians of modernism, Eugène Emmanuel Viollet-le-Duc was also the most renowned restoration architect of his age, a celebrated medieval archaeologist, and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture, such as the *Dictionnaire raisonné de l'architecture française du XI^e au XVI^e siècle* and *Entretiens sur l'architecture*, but also studies on warfare, geology, and racial history. Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration in all its layered meaning shaped his outlook. Through his life journey, we follow the route by which the technological subject was born out of nineteenth-century historicism. **Structures and Architecture - Bridging the Gap and Crossing**

Borders Paulo J.S. Cruz, 2019-07-08 *Structures and Architecture: Bridging the Gap and Crossing Borders* contains the lectures and papers presented at the Fourth International Conference on Structures and Architecture (ICSA2019) that was held in Lisbon, Portugal, in July 2019. It also contains a multimedia device with the full texts of the lectures presented at the conference, including the 5 keynote lectures and almost 150 selected contributions. The contributions on creative and scientific aspects in the conception and construction of structures on advanced technologies and on complex architectural and structural applications represent a fine blend of scientific, technical, and practical novelties in both fields.
