The Architecture Of Loss:

The Architecture of Loss Z. P. Dala, 2017-07-04 Estranged at the age of six from her mother who sent her away from her hometown of Brighton in rural Zululand brilliant architect Afroze Bhana has carved out an impressive life for herself in Cape Town But when she receives word that her aging mother is desperately ill she finds herself compelled to return to her place of birth to find answers about her painful childhood Afroze arrives in Brighton to find that her mother Sylvie who was a doctor and a fierce activist during the dark days of the anti apartheid struggle is a shadow of her formidable self but Sylvie has still retained her sarcasm and anger toward the daughter that she sent away Somehow Sylvie cannot draw her daughter close even facing the looming threat of her own mortality She remains in the cottage of Afroze s childhood frozen in a world where she surrounds herself with luxury and garish indulgences cared for by the fiercely protective Halaima a Malawian refugee A moving novel about the complexities of family ties **The Architecture of Loss** beautifully explores the ways in which the anti apartheid struggle a struggle in which the roles of women have been largely overlooked irrevocably damaged many of its unsung heroes

The Architecture of Error Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline s needs anxieties and desires When architects draw even brick walls to six decimal places with software designed to cut lenses it is clear that the logic that once organized relations between precision and material error in construction has unraveled Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness Meanwhile error and the always political space of its dissent has reconfigured itself In **The Architecture of Error** Francesca Hughes argues that behind the architect s acute fetishization of redundant precision lies a special fear of physical error What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks as by an unspoken horror of loss of control over error material life and everything that matter stands for Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials the proliferation of material testing and the rhetorical obstacles that blighted cybernetics Why is it she asks that the more we cornered physical error the more we feared it Hughes s analysis of redundant precision exposes an architecture of fear whose politics must be called into question Proposing error as a new category for architectural thought Hughes draws on other disciplines and practices that have interrogated precision and failure citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark Barbara Hepworth Rachel Whiteread and others These non architect practitioners she argues show that error need not be excluded and precision can be made accountable
