B. Stephens, 2003-01-30 This book offers a detailed and comprehensive guide to contemporary sources for research into the history of individual nineteenth century U S communities large and small The book is arranged topically covering demography ethnicity and race land use and settlement religion education politics and local government industry trade and transportation and poverty health and crime and thus will be of great use to those investigating particular historical themes at national state or regional level As well as examining a wide variety of types of primary sources published and unpublished quantitative and qualitative available for the study of many places the book also provides information on certain specific sources and some individual collections in particular those of the National Archives      **The New York Times Magazine** ,1981      **What a Building Does** Phillip Cox, Niall Cronin, 2025-09-30 Hoosier architect Evans Woollen 1927 2016 made a profound contribution to the built identity of Indianapolis Indiana Most recognized for introducing concrete Brutalism to the city his practice was in fact surprisingly diverse ranging from significant public buildings that are today some of the city s most iconic structures to humble churches single family homes and historic renovations Some loved his emphatic proudly modern buildings while others found them challenging severe or even ugly but all agreed they were boundary pushing the handiwork of an iconoclastic architect on the cutting edge of contemporary design Surveying the full breadth of Woollen s six decade career What a Building Does tells the complete story of this essential Midwestern practitioner for the first time from his early years as a student of Philip Johnson and Louis Kahn to his decision to open his practice in Indianapolis to his later professional successes across Indiana and beyond With a focus on ten of Woollen s most important built works this book explores the dynamic ideas which shaped his architecture and the complex relationship he held with Indianapolis his hometown Most significantly it also discovers a multi decade practice of empathetic human centered design conducted long before such ideas were mainstream Featuring nearly 150 new full color photos never before seen archival material and dozens of interviews with former colleagues clients and friends What a Building Does expands the narrative of modern architecture and its legacy in the American Midwest      **Nearby History** David E. Morgan, 2010-11-15 This book discusses how facts travel and when and why they sometimes travel well enough to acquire a life of their own Whether or not facts travel in this manner depends not only on their character and ability to play useful roles elsewhere but also on the labels packaging vehicles and company that take them across difficult terrains and over disciplinary boundaries These diverse stories of travelling facts ranging from architecture to

nanotechnology and from romance fiction to climate science change the way we see the nature of facts Facts are far from the bland and rather boring but useful objects that scientists and humanists produce and fit together to make narratives arguments and evidence Rather their extraordinary abilities to travel well shows when how and why facts can be used to build further knowledge beyond and away from their sites of original production and intended use
