Keng Cheng Ang, 2018-09-03 *Mathematical Modelling for Teachers Resources Pedagogy and Practice* provides everything that teachers and mathematics educators need to design and implement mathematical modelling activities in their classroom. Authored by an expert in Singapore, the global leader in mathematics education, it is written with an international readership in mind. This book focuses on practical classroom ideas in mathematical modelling suitable to be used by mathematics teachers at the secondary level. As they are interacting with students all the time, teachers generally have good ideas for possible mathematical modelling tasks. However, many have difficulty translating those ideas into concrete modelling activities suitable for a mathematics classroom. In this book, a framework is introduced to assist teachers in designing, planning, and implementing mathematical modelling activities, and its use is illustrated through the many examples included. Readers will have access to modelling activities suitable for students from lower secondary levels, Years 7 and 8 onwards, along with the underlying framework, guiding notes for teachers, and suggested approaches to solve the problems. The activities are grouped according to the types of models constructed: empirical, deterministic, and simulation models. Finally, the book gives the reader suggestions of different ways to assess mathematical modelling competencies in students. **Selected Papers from IIKII 2019 conferences in Symmetry**

Teen-Hang Meen, Charles Tijus, Jih-Fu Tu, 2020-12-15 The International Institute of Knowledge Innovation and Invention (IIKII) <http://www.iikii.org> promotes the exchange of innovations and inventions and establishes a communication platform for international innovations and research. In 2019, IIKII cooperates with the IEEE Tainan Section Sensors Council to hold IEEE conferences such as IEEE ICIASE 2019, IEEE ECBIOS 2019, IEEE ICKII 2019, ICUSA GAME 2019, and IEEE ECICE 2019. This Special Issue, entitled *Selected Papers from IIKII 2019 conferences*, aims to showcase outstanding papers from IIKII 2019 conferences, including symmetry in physics, chemistry, biology, mathematics, and computer science, etc. It selected 21 outstanding papers from 750 papers presented in IIKII 2019 conferences on the topic of symmetry. The main goals of this Special Issue are to encourage scientists to publish their experimental and theoretical results in as much detail as possible and to discover new scientific knowledge relevant to the topic of symmetry. **Sustainable Parking Management**

Nada Milosavljevic, Jelena Simicevic, 2019-05-09 *Sustainable Parking Management* provides the latest research findings in the field, encouraging transport planners and policymakers to use parking policy as a tool for managing parking and transport systems. The book teaches up-to-date parking management techniques for selecting parking policies and understanding parking behavior when faced with policy interventions. It shows when to apply each policy, how to include user attitudes in policy definition, and how to model user behavior when refining parking policies. In addition, it stresses the need to reduce overall city driving and the need to allow users to choose the transport mode that best suits their needs. As the growth of cities and car dependency worldwide has led to parking problems, resulting in increased traffic congestion, pollution, and overall urban chaos, this book creates a model to help deal with the fallout. Offers step-by-step procedures for defining sustainable parking policies. Synthesizes the latest research into one
