The Dingo 1:

The Dingo Debate Bradley Smith, 2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal the dingo Throughout its existence the dingo has been shaped by its interactions with human societies With this as a central theme the book traces the story of the dingo from its beginnings as a semi domesticated wild dog in South east Asia to its current status as a wild Australian native animal under threat of extinction It describes how dingoes made their way to Australia their subsequent relationship with Indigenous Australians their successful adaption to the Australian landscape and their constant battle against the agricultural industry During these events the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species The book concludes with a discussion of what the future of the dingo in Australia might look like what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co existence The Dingo Debate reveals the real dingo beneath the popular stereotypes providing an account of the dingo's behaviour ecology impacts and management according to scientific and scholarly evidence rather than hearsay This book will appeal to anyone with an interest in Australian natural history wild canids and the relationship between humans and carnivores [The Dingo #1](#) Sean Leary, Bob Zany, 2003-03-01 **Mobile**

Genetic Elements in Metazoan Parasites Paul J. Brindley, 2009-10-28 Substantial proportions of the genome of most eukaryotes including those of metazoan parasites are comprised of repetitive sequences Mobile genetic elements MGEs constitute much of the repetitive component particularly the interspersed sequences This volume of nine chapters addresses MGEs that have colonized the genomes of medically important metazoan parasites and their vectors These MGEs are parasites of parasites These mobile elements are compared and contrasted with those from better studied model organisms The authors have included plentiful relevant and informative illustrations and references Several chapters focus on mobile elements of the human schistosomes Gerardo Ferbeyre focuses on the putative ribozyme activities on the SM alpha elements SINE like elements including trans reactions catalyzed by these retroposons Ricardo DeMarco and Sergio Verjovski Almeida review the cut and paste transposons of schistosomes including the Merlin and the SmTRC1 elements and application of schistosome DNA transposons to transgenesis and mutagenesis Claudia Copeland Thewarach Laha and I review the retrovirus like retrotransposons and non long terminal repeat transposable elements of the schistosomes including the Boudicca fugitive and SR2 elements Young An Bae and Yoon Kong provide descriptions of retrotransposons from the human liver and lung flukes *Clonorchis sinensis* and *Paragonimus westermani* respectively including the CsRn1 long terminal repeat retrotransposon Continuing the investigations of MGEs of parasitic worms Thewarach Laha Alex Loukas and I summarize current knowledge of MGEs from hookworms including details of the bandit and Transib transposons and dingo retrotransposons Mobile elements in vectors of human parasites are also covered Matty Knight and coauthors describe the nimbus retrotransposon and its discovery and other repetitive elements from the genome of the gastropod snail *Biomphalaria*

glabrata the intermediate host of *Schistosoma mansoni* Zhijian Tu and Song Ti review MGEs of *Anopheles* mosquitoes vectors of malaria and other mosquitoes They discuss practical uses of these MGEs Craig Coates provides an expert article on transposon mediated transgenesis of mosquitoes in particular dealing with his pioneering studies on the deployment of binary systems with the Mos1 mariner transposon MGEs from the genomes of these metazoan parasites have practical uses in transgenesis and epidemiological studies and also are valuable for annotation of the genomes of these vectors and pathogens These issues and future directions are well covered in these chapters

The Dingo Hunter Laurie Corbett, 2025-03-21 Laurie Corbett was born in Castlemaine Victoria in 1941 and spent much of his early life catching wildlife to supplement the family diet and thus developed an understanding and love of the bush and its fauna He joined the CSIRO Division of Wildlife Research to study dingoes and their prey in central Australia 1968-75 and later 1980-96 in Kakadu National Park Intervening those years he studied Scottish wildcats and feral cats in Aberdeenshire and the Outer Hebrides At that time he regularly returned home for Christmas where en route he discovered dingoes in Thailand and other South east Asian countries and subsequently made regular visits to study them resulting in a Whitley Award for his 1995 book *The Dingo in Australia and Asia* In 1997 he led ecological surveys at Bradshaw Field Training Area and at Christmas Island and concurrently was a member of IUCN's Canid Specialist Group with field work in Indonesia In 2007 he formed his own consulting company to provide dingo management advice at mine sites in deserts throughout Australia Throughout this journey he met an incredible array of characters and experienced many unusual events most pleasant but others not so This illustrated narrative provides research data in conjunction with the day to day joy frustration and danger associated with working in outback Australia Similarly in relatively isolated regions of Thailand Laos and Burma where the English language is not spoken and unintentional non compliance with local customs can have dangerous outcomes
