Kortright, 1942 **AMNH Birds of North America** DK, 2020-11-03 Ideal for the armchair bird enthusiast or dedicated bird watcher this book includes stunning full color photographs revealing each species with unrivaled clarity A lavish introduction describes bird characteristics and behavior while stunning full color photographs reveal individual species for easy identification The 550 most commonly seen birds are pictured in clear close up photographs with images of similar birds provided to make differentiation easy from game birds and waterfowl to shorebirds and swifts to owls hummingbirds finches and more Discover which species to expect when and where with up to date color coded maps highlighting habitation and migratory patterns The most commonly seen species are given a whole page in the species catalog and each full page profile includes images of plumage variations subspecies information on similar birds and artwork of the bird in flight that reveal their outstretched wings Rare birds and vagrants who occasionally stray into North America are also described making **AMNH Birds of North America** one of the most comprehensive guides on the market and essential for anyone interested in birding *The Teal* Matthieu Guillemain, Johan Elmberg, 2014-10-23 Small noisy and colourful the Teal is a familiar duck throughout the wetlands and waterways Europe and Asia Once hunted extensively for the pot its

numbers have recovered and it is now one of our commonest species of waterfowl. A flagship species for wetland conservation, the Teal is also an excellent model species for ecological research and this forms the spine of this new Poyser monograph. The Teal looks at distribution and trends in numbers, foraging ecology, breeding behaviour, population dynamics, management and conservation of teal, looking at both the Eurasian Common Teal and its North American equivalent, the Green-winged Teal, which until relatively recently was considered to be the same species. The book provides a scientifically robust account on which wetland managers, research scientists and the ornithological community may rely, with wider implications for the conservation and management of other waterfowl and for ecological research in general.

Ducks, Geese, and Swans of North America Guy A. Baldassarre, 2014. Ducks, Geese and Swans of North America has been hailed as a classic since the first edition was published in 1942. A must have for professional biologists, birders, waterfowl hunters, decoy collectors and wildlife managers, this fully revised and updated edition provides definitive information on the continent's forty-six species. Maps of both winter and breeding ranges are presented with images by top waterfowl photographers and the acclaimed original artwork of Robert W. Bob Hines. Originally authored by F. H. Kortright and later revised by Frank Bellrose, this latest edition, which has been meticulously updated by renowned waterfowl biologist Guy Baldassarre, continues the legacy of esteemed authors. Each species account contains in-depth sections on identification, distribution, migration, behavior, habitat, population status, breeding biology, rearing of young, recruitment and survival, food habits and feeding ecology, molts and plumages, conservation and management. To facilitate identification, the species accounts also include detailed illustrations of wings. An appendix contains comparative illustrations of ducklings, goslings and cygnets. Guy Baldassarre has hit the target. His remake of the Kortright-Bellrose classic provides good biological descriptions, wonderful photographs and illustrations and easy-to-understand information about waterfowl. I would encourage every hunter and enthusiast to have these books as an educational guide to waterfowl and their needs.

H. Dale Hall, CEO, Ducks Unlimited Inc. When, as an eleven-year-old in 1942, I read F. H. Kortright's first edition of this book, it altered the trajectory of my life. Every subsequent edition, including this latest update by Guy Baldassarre, has improved the landmark reference. I can't imagine that anyone interested in waterfowl or wetlands can live without this indispensable book.

Paul A. Johnsgard, University of Nebraska-Lincoln. Creating a brand new version of such a timeless and previously revised classic is a risky venture, indeed, but nobody could be better suited for this monumental task than Guy Baldassarre. He has created a stunning new classic, at once magnificent in its visual appeal and truly comprehensive in its scientific breadth and depth. Hats off to Guy for dedicating himself to this project with such obvious passion, patience and skill. This book absolutely belongs on the shelf or coffee table of anyone who has ever marveled at waterfowl, whether through their binoculars or from inside the duck blind.

John W. Fitzpatrick, Cornell Laboratory of Ornithology. Guy Baldassarre was a professor of wildlife ecology at the State University of New York College of Environmental Science and Forestry in Syracuse until his death in 2012. He is the coauthor of the textbook *Waterfowl*.
