Wieland Schmied

The Early Chirico:

The Early Chirico James Thrall Soby, 1941 Geometry of Shadows Giorgio De Chirico, 2019 Gathered from early twentieth century Italian magazines manuscripts correspondence television recordings and ephemeral art volumes Geometry of Shadows is the first comprehensive collection of Giorgio de Chirico's Italian poetry with award winning poet Stefania Heim's translations presented alongside the Italian originals De Chirico's poems are as essential and as mysterious as his paintings

Jhumpa Lahiri A multifaceted artist who lived in multiple languages de Chirico was just becoming famous in France for the paintings that inspired surrealism when he returned to Italy in 1916 to enlist for the First World War Quickly determined unfit for the front line de Chirico was assigned to desk duty and began to write poems in his native language Translating his iconic visual imagination into literary form Geometry of Shadows is a gorgeous document celebrating the elasticity and innate potential of language by an artist ever in pursuit of deeper understanding De Chirico. Ediz. inglese Magdalena Holzhey, 2005 Greek born Italian painter Giorgio De Chirico 1888 1978 was hugely influential in the early years of the Surrealist movement His paintings during the teens in Paris where he moved in 1911 caused such a stir that such important figures as Picasso and Paul Eluard immediately praised them This phase of his work which he later termed *pittura metafisica* metaphysical painting was marked by dramatic compositions involving sharp perspective striking shadows geometrical planes voids of space and a general feeling of anxiety and loneliness the sense of absurdity evoked by the mannequin like figures in almost nightmarish landscapes seemed to suggest a Freudian expression of the unconscious After 1930 De Chirico turned to a more classical style of painting and continued in the same vein for the rest of his career his later work was widely criticized especially by the Surrealists who had so admired his early paintings

Giorgio de Chirico and America Giorgio De Chirico, 1996 De Chirico Giorgio De Chirico, 1996 Giorgio de Chirico 1888 1978 is widely regarded as one of the masters of 20th century art The originator of Metaphysical Painting and precursor of the Surrealists de Chirico was born in Volos Greece studied at the Academy of Fine Arts in Munich and was initially influenced by Bocklin and Klinger However he soon developed his own distinctive style producing the first of his enigmatic paintings in Italy around 1910 De Chirico's early works evoked an uneasy atmosphere through their use of strange perspectives illogical shadows and open spaces and he developed a theory of metaphysical insight which located familiar objects in essentially mysterious relationships In de Chirico's oeuvre a naturalistic vision always alternates like waking and sleeping or dreaming with another vision presenting abnormal forms and situations If de Chirico's first period of Metaphysical painting between 1910 and 1918 remains his most celebrated and has provided us with some of his most memorable images it is also true that his later Metaphysical period was also a time of intense creativity and evocative art making But this period is his least well known De Chirico moved on from his baroque and romantic paintings of the Forties and Fifties works which diminished his standing among a number of art critics to a new Metaphysical period which related strongly to the rich early phase of his work This book is a celebration of

that period in de Chirico's career and evaluates not only his paintings but also the mythic and symbolic sculptures produced at this time. De Chirico: The New Metaphysics is an essential resource for any reader interested in appreciating de Chirico's unique contribution to 20th century art.

Giorgio de Chirico Wieland Schmied, 2002. A study of the art of Giorgio de Chirico, inventor of a symbolic style which had a strong influence on 20th century art. This text focuses on the artist's mysterious representations of the human form.

The Early Avant-Garde in Twentieth-Century Literature and Art Willard Bohn, 2018-05-11. This book focuses on avant garde literature and art in Europe and America during the first quarter of the twentieth century. It examines five movements that shaped our response to the demands of the modern age and contributed to the creation of a modern sensibility: Cubism, Futurism, the Metaphysical School, Dada, and Surrealism. Each of these arose in response to recent scientific, technological, and/or philosophical developments that drastically affected modern civilization. In turn, each was responsible for a major paradigm shift that altered the way in which we view and respond to the world around us. The final chapter is comparative in nature and studies the role of the mannequin in literature and art during the same period.

Giorgio de Chirico. [Illustr.] - New York: The Museum of Modern Art [1955]. 267 S. 8° James Thrall Soby, 1955. 195 reproductions including 10 in color and extracts from the artist's own writings which serve to illuminate the meaning underlying his work.

Giorgio de Chirico. Catalogue Raisonné of the Work of Giorgio de Chirico. Ediz. Illustrata Paolo Baldacci, Gerd Roos, 2019. De Chirico's early work can be divided into distinct phases, styles, subjects, iconography, and poetic themes, which allows each volume to be effectively a monograph that stands up in its own right. Volume one: The late romantic and early metaphysical works includes all the paintings and drawings from autumn 1908 to February 1919 and all the revivals, copies, and variations of the metaphysical theme about 70 works documented to the period 1922-43. There are 7 fascicles in Volume one. In this fascicle 2, the chronological sequence of the works is strictly followed for 1912. The works from 1913, though for greater legibility and clarity, are ordered in this sequence: drawings, portraits, and nudes attributable to the first part of the year; compositions with Ariadne and related drawings in chronological order; towers, chimneys, and other compositions with related drawings in chronological order; drawings relating to the summer-autumn 1913 period. Detailed reasons are given for the dating of the works, each of which is also discussed from the iconographic and stylistic point of view. These volumes are the most complete and up-to-date treatment of this mysterious and enigmatic artist whose creative and intellectual story is one of the most gripping and important of the twentieth century.

History of the Surrealist Movement Gérard Durozoi, 2002. Tracing the movement from its origins in the 1920s to its decline in the 1950s and 1960s, Durozoi tells the history of Surrealism through its activities, publications, and reviews, demonstrating its close ties to some of the most explosive political as well as creative debates of the twentieth century. Unlike other histories which focus mainly on the pre-World War II years of the movement in Paris, Durozoi covers both a wider chronological and geographic range, treating in detail the postwar years and Surrealism's

colonization of Latin America the United States Japan Czechoslovakia Belgium Italy and North Africa Drawing on documentary and visual evidence including 1 000 photos many of them in color he illuminates all the intellectual and artistic aspects of the movement from literature and philosophy to painting photography and film All the Surrealist stars and their most important works are here Aragon Borges Breton Bu uel Cocteau Crevel Dal Desnos Ernst Man Ray Soupault and many more for all of whom Durozoi has provided brief biographical notes in addition to featuring them in the main text
