Sir Mansfield Cumming:

The Quest for C Alan Judd, 1999 A fascinating and unique history of the launch of Britain's Secret Intelligence Service through the unusual life of its founder Mansfield Cumming Sir Mansfield Cumming the founder of the British Secret Service and the original C has until now been a shadowy figure For this authorised biography the Secret Intelligence Service has released to Alan Judd Cumming's voluminous diaries which have never been seen outside the Service and will be put back into storage in perpetuity when Judd has used them The result is likely to be the most sensational biography of the season and the definitive account of how MI5 and MI6 the models for all subsequent secret services all over the world were set up Cumming signed himself C was referred to as such in Whitehall and always used green ink traditions maintained to this day His life not only makes riveting reading but casts fascinating light on the development of the Secret Service and its influence on the twentieth century

Spy Hunter H.B. The Secret War Between the Wars Kevin Quinlan, 2014 The methods developed by British intelligence in the early twentieth century continue to resonate today Much like now the intelligence activity of the British in the pre Second World War era focused on immediate threats posed by subversive clandestine networks against a backdrop of shifting great power politics Even though the First World War had ended the battle against Britain's enemies continued unabated during the period of the 1920s and 1930s Buffeted by political interference and often fighting for their very survival Britain's intelligence services turned to fight a new clandestine war against rising powers Soviet Russia and Nazi Germany Using recently declassified files of the British Security Service MI5 *The Secret War Between the Wars* details the operations

and tradecraft of British intelligence to thwart Communist revolutionaries Soviet agents and Nazi sympathizers during the interwar period This new study charts the development of British intelligence methods and policies in the early twentieth century and illuminates the fraught path of intelligence leading to the Second World War An analysis of Britain's most riveting interwar espionage cases tells the story of Britain's transition between peace and war The methods developed by British intelligence in the early twentieth century continue to resonate today Much like now the intelligence activity of the British in the pre Second World War era focused on immediate threats posed by subversive clandestine networks against a backdrop of shifting great power politics As Western countries continue to face the challenge of terrorism and in an era of geopolitical change heralded by the rise of China and the resurgence of Russia a return to the past may provide context for a better understanding of the future Kevin Quinlan received his PhD in History from the University of Cambridge He works in Washington DC

Secrecy and the Media Nicholas John Wilkinson, 2009-05-28 Secrecy and the Media is the first book to examine the development of the D Notice system which regulates the UK media's publication of British national security secrets It is based on official documents many of which have not previously been available to a general audience as well as on media sources From Victorian times British governments have consistently seen the need in the public interest to prevent the media publishing secret information which would endanger national security The UK media have meanwhile continuously resisted official attempts to impose any form of censorship arguing that a free press is in the public interest Both sides have normally seen the pitfalls of attempting to resolve this sometimes acrimonious conflict of interests by litigation and have together evolved a system of editorial self regulation assisted by day to day independent expert advice known colloquially as the D Notice System The book traces the development of this system from nineteenth century colonial campaigns through two world wars to modern operations and counter terrorism in the post Cold War era up to the beginning of the Labour government in 1997 Examples are drawn from media political and official sources some not yet open and cover not only defence issues including Special Forces but also the activities of the secret intelligence services MI5 MI6 and GCHQ These cases relate principally to the UK but also to American and other allies interests The story of how this sometimes controversial institution now operates in the modern world will be essential reading for those in the media and government departments and for academics and students in the fields of security defence and intelligence as well as being an accessible expos for the general reader Nicholas Wilkinson served in the Royal Navy 1959-98 and from 1999 to 2004 he ran the independent Defence Press and Broadcasting Advisory Committee He was a Press Complaints Commissioner from 2005 to 2008 and is a Cabinet Office Historian
