A Revolution in Music Évelyne Gayou, 2025 Established in the 1950s by musician and engineer Pierre Schaeffer the Groupe de Recherches Musicales would become the nerve center for avant garde artists experimenting with sound and acoustics as well as the birthplace of a genre of music making enabled by new recording technologies and sound pioneers musique concrète Evelyne Gayou herself a researcher composer and producer at the GRM tells the history of the storied institution through the people works technologies and research developed there Placing musique concrète within a broad historical context extending from the early twentieth century avant garde's experiments with noise to the development of techniques in sound recording at the Studio d'Essai in the 1940s and later in sound synthesis Gayou shows how recording technology made it possible for composers to not only create music from sounds in the world around them but also create acousmatic music novel sounds without a visible connection to their source Available in English translation for the first time this updated edition will be an important resource for readers interested in the pioneering works and techniques of Schaeffer and his contemporaries as well as their influence on the makers of new music and the contemporary avant garde

Selected Writings: Major works, 1976-1980 Roman Jakobson, 1971

Morphogenesis of the Sign David Piotrowski, 2018-04-23 This book develops a morphodynamical approach to linguistic and sign structures as an integrated response to multilevel and interrelated problems in semiolinguistic research More broadly the content is linked to the realities of living speech through a connection via the concept of diacriticité with the Merleau Pontian phenomenology and beyond the formal determinations of a semiolinguistic system and its calculus Such problems are mainly epistemological

concerning the nature and legitimate scope of semiolinguistic knowledge empirical concerning the observational device and the data s composition and theoretical regarding the choice of a conceptual and formalized explicative frame With regard to theory the book introduces a morphodynamical architecture of linguistic signs and operations as a suitable mathematization of Saussurean theory The Husserlian phenomenological signification of this formal apparatus is then established and from an empirical standpoint its compatibility with neurobiological experimental results is discussed **Selected Writings** Roman Jakobson, 1962
