Developing Reflective TESOL Practitioners Through Teacher Education Andrzej Cirocki,Mark Wyatt,Xuesong (Andy) Gao,2024-06-26 This textbook provides insights from Asian contexts into how reflective practice is nurtured on Teaching English to Speakers of Other Languages TESOL and English Language Teaching ELT teacher education programmes There is increasing recognition worldwide that given the centrality of reflective practice to teachers

ongoing professional development supporting teachers to become reflective practitioners should be integral to teacher education programmes. Consequently tertiary level courses in areas such as TESOL and ELT tend to promote reflective practice supported by theoretical input from the burgeoning literature on reflection, much of which is produced in the West. Relatively under-represented in the literature are global perspectives on reflective practice; there are consequently relatively few accounts as to how reflective practice is embedded in teacher education programmes in different parts of the world, including Asia. Hence this book addresses a gap. Contributing authors from fourteen countries provide insights into the ways in which teachers are helped to grow as reflective practitioners on their teacher education programmes in their unique contexts. This textbook showcases how reflective teaching practices are developed, supported by frameworks for critical reflection and in interaction with local educational policies. These distinctive accounts aid readers in reflecting on the ways in which reflective practice is supported in their own teacher education contexts and in considering ways of enhancing the reflective dimension of their programmes. This textbook showcases innovative reflective activities and can be used as a principal text or as supplemental reading on a range of TESOL and ELT teacher education courses.

***Assessment and Learning in Content and Language Integrated Learning (CLIL) Classrooms*** Mark deBoer, Dmitri Leontjev, 2020-11-17. This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into learners' abilities, but more importantly how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic of teaching, learning and assessment as inter-related and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume in turn will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

***Automatic Assessment of Prosody in Second Language Learning*** Florian Hönig, 2017. Worldwide there is a universal need for second language language learning. It is obvious that the computer can be a great help for this, especially when equipped with methods for automatically assessing the learner's pronunciation. While assessment of segmental pronunciation quality, i.e. whether phones and words are pronounced correctly or not, is already available in commercial software packages, prosody, i.e. rhythm, word

accent etc is largely ignored although it highly impacts intelligibility and listening effort The present thesis contributes to closing this gap by developing and analyzing methods for automatically assessing the prosody of non native speakers We study the detection of word accent errors and the general assessment of the appropriateness of a speaker s rhythm We propose a flexible generic approach that is a very successful on these tasks b competitive to other state of the art result and at the same time c flexible and easily adapted to new tasks
